Praxeological Entrepreneurship: and Equilibrium

J. Patrick Gunning

Detailed Contents

Chapter 1: Introduction
- A. The Goal of Economics
- B. Nature of Economic Phenomena
- C. The Method of Economics
- D. The Pure Market Economy
- E. Plan of This Book

Chapter 2: Entrepreneurship
- A. The Properties of Action and the Problem of Elucidating Entrepreneurship
  - 1. Identifying the Properties of Action
  - 2. Identifying Action in the Market Economy
- B. The Three Personal Properties of Praxeological Entrepreneurship
  - 1. Appraisement
  - 2. Undertaking
  - 3. Uncertainty-Bearing
- C. The Pure Entrepreneur Economy and Examples of Entrepreneurship
  - 1. The Pure Entrepreneur and Related Economies
  - 2. Giving Examples of Entrepreneurship

Chapter 3: Entrepreneurial Interaction
- A. The Praxeological Theory of Transacting
  - 1. The Austrian Theory of Value and Cost
    - a. Error
  - 2. The Interventionist Ideology

3. A Praxeological Theory
a. Pre-Transaction Activities
b. Transaction Variables
c. Origins of the Theory
4. The Special Status of the Employment Compact
a. The Agency Problem and Governance
B. Producer-Seller Competition
1. Copying and Innovating
a. Copying Through the Eyes of the Actors in the Major Roles
b. Innovating
C. Consumer Sovereignty
1. The Analogy with Individual Action
2. Errors in Interaction
a. Producers' Opportunities to Induce and Take Advantage of Consumers' Errors
b. Errors and Other Roles
c. The Significance of Consumer Sovereignty
3. Mises's Neglect of Error
4. Collaborative Monopoly
5. External Effects
6. Factor Supplier Sovereignty?
D. Selection of the Factors of Production and of Producers
1. A Note on the Common Use of the Term "Entrepreneur"

Chapter 4: Critique of Mises on Entrepreneurship
A. Praxeology and the Procedure of Economics
B. Mises's Two Concepts of the Entrepreneur
1. The Functional Entrepreneur
2. The Promoter
C. Critique
1. The Functional Entrepreneur
2. The Promoter
a. Promoters and Differences in Wants
b. Promoters and Differences in Abilities
D. Promoters and Progress
1. Additional Capital Goods
a. Luck
b. Change in Time Preference
2. Improvement in Technical Methods of Production
3. Economic Progress With a Praxeological

Foundation
4. Personal Differences a Fundamental Assumption of Praxeological Economics
E. The Ultimate Source of Profit

Chapter 5: Critique of Mises on "The Market" and Prices
A. The Market
1. Sovereignty of the Consumers
2. Competition
3. Entrepreneurial Profit and Loss
4. Promoters, Managers, Technicians, and Bureaucrats
5. The Selective Process
6. Conclusion
B. Prices
1. The Image of Imputation
2. The Pricing Process
3. Praxeological Entrepreneurship and Final Prices
4. Interventionist Arguments Not About Price
a. Intervention in Compacts and Contracts
b. Externalities
5. Refutation of the Marxist and Socialist Theory of Wages
a. Do Employers Set Wages?
b. The Argument That a Government Administrator Should Set Wages
c. Do Workers Receive Less Than Their Contribution?
d. Are Wages Set by a Class?
e. The Collaborative Monopsony Problem
6. The Monopoly Price and Mathematical Economics

Chapter 6: The Two Uses of Equilibrium in Praxeological Economics
A. Equilibrium as an Actionless State
1. Using the Counterfactual to Deal With Complexity
2. The Robot Economy and Its Uses
B. Equilibrium as an Image of Fully Synchronized Plans
1. Giving an Example of a Particular Action of an Isolated Actor

a. Fulfilled and Unfulfilled Expectations
2. Giving an Example of a Particular Case of Economic Interaction
a. The Robot Economy and the Image of Fully Synchronized Plans
b. An Image of Non-Synchronized Plans
c. Fulfilled and Unfulfilled Expectations
3. Achieving Greater Synchronization
a. Positioning
b. Obtaining Commitments
4. Imaginary Constructions and Reality
5. Nothing New But Articulation
6. The Pebble-in-the-Still-Pond Metaphor
7. Recapitulation: Epistemology of Economic Theory
C. The Means of Synchronization

Chapter 7: Critique of Mises on Equilibrium
A. Why the ERE is an Inadequate Endpoint
1. The Limited Usefulness of an Endpoint in Elucidating an Individual's Action
2. Using the ERE as an endpoint to Help Understand Economic Interaction
B. A Tendency In Every Action Toward the Establishment of the ERE
1. Using an Image of an Endpoint to Give Examples of Isolated Action
2. An Endpoint of Economic Interaction
3. Where Mises's Assertion Fits Into the Procedure of Praxeological Economics
C. The ERE in Factor Price Determination
1. ERE Factor Markets are Neither Realistic Nor Praxeological
2. Goal is to Refute Socialist and Marxist Exploitation Theory Using Marginal Productivity Theory
3. Praxeological Refutation of the Exploitation Hypothesis
4. Why the Evenly Rotating Economy Statement is Incomplete
D. Change in the Data vs. Action in Economic Theory
E. What's Wrong with Mathematical Equilibrium
1. Discovery of Price Discrepancies?
2. Entrepreneurship or Robot Entrepreneurs?

F. Is the Market Process Cooperative?

Chapter 8: Literature on Equilibrium and Misesian Entrepreneurship
- A. Selgin on Equilibrating
  - 1. The Stated Purpose of Selgin's Exercise
  - 2. Selgin's Notion of Equilibration
  - 3. The Status of "Coordination"
  - 4. Critique
    - a. The Redundancy of Equilibration
    - b. A Wall Between Praxeology and Economics?
    - c. Mises on the Aim and Scope of Economics
    - d. Procedure
    - e. General Assessment
- B. Salerno's Conception of the Market Process
  - 1. Prices as Data for Economic Calculation
  - 2. The Open-Ended Market Process
  - 3. Market Prices as Coordinating

Chapter 9: Conclusion
- A. Entrepreneurship
  - 1. Mises's Place in the History of Entrepreneurship
  - 2. Sidetracked by the Theory of Imputation
  - 3. Other Omissions
  - 4. Commentary
- B. Equilibrium
  - 1. The Robot Economy as a Counterfactual
  - 2. The Endpoint and the Final State of Rest
