Congress finds the following:

(1) In June 2004, the Office of the Coordinator for Reconstruction and Stabilization (referred to as the “Coordinator”) was established in the Department of State with the mandate to lead, coordinate, and institutionalize United States Government civilian capacity to prevent or prepare for post-conflict situations and help reconstruct and stabilize a country or region that is at risk of, in, or is in transition from, conflict or civil strife.

(2) In December 2005, the Coordinator’s mandate was reaffirmed by the National Security Presidential Directive 44, which instructed the Secretary of State, and at the Secretary’s direction, the Coordinator, to coordinate and lead integrated United States Government efforts, involving all United States departments and agencies with relevant capabilities, to prepare, plan for, and conduct reconstruction and stabilization operations.

(3) National Security Presidential Directive 44 assigns to the Secretary, with the Coordinator’s assistance, the lead role to develop reconstruction and stabilization strategies, ensure civilian interagency program and policy coordination, coordinate interagency processes to identify countries at risk of instability, provide decision-makers with detailed options for an integrated United States Government response in connection with reconstruction and stabilization operations, and carry out a wide range of other actions, including the development of a civilian surge capacity to meet reconstruction and stabilization emergencies. The Secretary and the Coordinator are also charged with coordinating with the Department of Defense on reconstruction and stabilization responses, and integrating planning and implementing procedures.

(4) The Department of Defense issued Directive 3000.05, which establishes that stability operations are a core United States military mission that the Department of Defense must be prepared to conduct and support, provides guidance on stability operations that will evolve over time, and assigns responsibilities within the Department of Defense for planning, training, and preparing to conduct and support stability operations.

(5) The President’s Fiscal Year 2009 Budget Request to Congress includes $248.6 million for a Civilian Stabilization Initiative that would vastly improve civilian partnership with United States Armed Forces in post-conflict stabilization situations, including by establishing a Active Response Corps of 250 persons, a Standby Response Corps of 2,000 persons, and a Civilian Response Corps of 2,000 persons.

Public Law 110–420
110th Congress

An Act

To require the issuance of medals to recognize the dedication and valor of Native American code talkers.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Code Talkers Recognition Act of 2008”.

SEC. 2. PURPOSE.

The purpose of this Act is to require the issuance of medals to express the sense of the Congress that—

(1) the service of Native American code talkers to the United States deserves immediate recognition for dedication and valor; and

(2) honoring Native American code talkers is long overdue.

SEC. 3. FINDINGS.

The Congress finds the following:

(1) When the United States entered World War I, Native Americans were not accorded the status of citizens of the United States.

(2) Without regard to that lack of citizenship, members of Indian tribes and nations enlisted in the Armed Forces to fight on behalf of the United States.

(3) The first reported use of Native American code talkers was on October 17, 1918.

(4) Because the language used by the Choctaw code talkers in the transmission of information was not based on a European language or on a mathematical progression, the Germans were unable to understand any of the transmissions.

(5) This use of Native American code talkers was the first time in modern warfare that such a transmission of messages in a native language was used for the purpose of confusing an enemy.

(6) On December 7, 1941, Japan attacked Pearl Harbor, Hawaii, and the Congress declared war the following day.

(7) The Federal Government called on the Comanche Nation to support the military effort during World War II by recruiting and enlisting Comanche men to serve in the Army to develop a secret code based on the Comanche language.

(8) The United States Army recruited approximately 50 Native Americans for special native language communication assignments.
(9) The United States Marine Corps recruited several hundred Navajos for duty in the Pacific region.
(10) During World War II, the United States employed Native American code talkers who developed secret means of communication based on native languages and were critical to winning the war.
(11) To the frustration of the enemies of the United States, the code developed by the Native American code talkers proved to be unbreakable and was used extensively throughout the European theater.
(12) In 2001, the Congress and President Bush honored Navajo code talkers with congressional gold medals for the contributions of the code talkers to the United States Armed Forces as radio operators during World War II.
(13) The heroic and dramatic contributions of Native American code talkers were instrumental in driving back Axis forces across the Pacific during World War II.
(14) The Congress should provide to all Native American code talkers the recognition the code talkers deserve for the contributions of the code talkers to United States victories in World War I and World War II.

SEC. 4. DEFINITIONS.
In this Act, the following definitions shall apply:
(1) CODE TALKER.—The term "code talker" means a Native American who—

SEC. 2. FINDINGS.

The Congress finds, on this, the 50th anniversary of the establishment of the National Aeronautics and Space Administration, the following:

1. NASA is and should remain a multimission agency with a balanced and robust set of core missions in science, aeronautics, and human space flight and exploration.

2. Investment in NASA’s programs will promote innovation through research and development, and will improve the competitiveness of the United States.

3. Investment in NASA’s programs, like investments in other Federal science and technology activities, is an investment in our future.

4. Properly structured, NASA’s activities can contribute to an improved quality of life, economic vitality, United States leadership in peaceful cooperation with other nations on challenging undertakings in science and technology, national security, and the advancement of knowledge.

5. NASA should assume a leadership role in a cooperative international Earth observations and research effort to address key research issues associated with climate change and its impacts on the Earth system.

6. NASA should undertake a program of aeronautical research, development, and where appropriate demonstration activities with the overarching goals of—

   A. ensuring that the Nation’s future air transportation system can handle up to 3 times the current travel demand and incorporate new vehicle types with no degradation in safety or adverse environmental impact on local communities;

   B. protecting the environment;

   C. promoting the security of the Nation; and

   D. retaining the leadership of the United States in global aviation.

7. Human and robotic exploration of the solar system will be a significant long-term undertaking of humanity in the 21st century and beyond, and it is in the national interest that the United States should assume a leadership role in a cooperative international exploration initiative.

8. Developing United States human space flight capabilities to allow independent American access to the International Space Station, and to explore beyond low Earth orbit, is a strategically important national imperative, and all prudent steps should thus be taken to bring the Orion Crew Exploration...
Vehicle and Ares I Crew Launch Vehicle to full operational capability as soon as possible and to ensure the effective development of a United States heavy lift launch capability for missions beyond low Earth orbit.

(9) NASA's scientific research activities have contributed much to the advancement of knowledge, provided societal benefits, and helped train the next generation of scientists and engineers, and those activities should continue to be an important priority.

(10) NASA should make a sustained commitment to a robust long-term technology development activity. Such investments represent the critically important “seed corn” on which NASA's ability to carry out challenging and productive missions in the future will depend.

(11) NASA, through its pursuit of challenging and relevant activities, can provide an important stimulus to the next generation to pursue careers in science, technology, engineering, and mathematics.

(12) Commercial activities have substantially contributed to the strength of both the United States space program and the national economy, and the development of a healthy and robust United States commercial space sector should continue to be encouraged.

(13) It is in the national interest for the United States to have an export control policy that protects the national security while also enabling the United States aerospace industry to compete effectively in the global marketplace and the United States to undertake cooperative programs in science and human space flight in an effective and efficient manner.

SEC. 507. ASSESSMENT OF IMPEDIMENTS TO INTERAGENCY COOPERATION ON SPACE AND EARTH SCIENCE MISSIONS.

(a) ASSESSMENTS.—The Administrator, in consultation with other agencies with space science programs, shall enter into an arrangement with the National Academies to assess impediments, including cost growth, to the successful conduct of interagency cooperation on space science missions, to provide lessons learned and best practices, and to recommend steps to help facilitate successful interagency collaborations on space science missions. As part of the same arrangement with the National Academies, the Administrator, in consultation with NOAA and other agencies with civil Earth observation systems, shall have the National Academies assess impediments, including cost growth, to the successful conduct of interagency cooperation on Earth science missions, to provide lessons learned and best practices, and to recommend steps to help facilitate successful interagency collaborations on Earth science missions.

SEC. 508. ASSESSMENT OF COST GROWTH.

(a) STUDY.—The Administrator shall enter into an arrangement for an independent external assessment to identify the primary causes of cost growth in the large-, medium-, and small-sized space and Earth science spacecraft mission classes, and make recommendations as to what changes, if any, should be made to contain costs and ensure frequent mission opportunities in NASA's science spacecraft mission programs.

(b) REPORT.—The report of the assessment conducted under subsection (a) shall be submitted to Congress not later than 15 months after the date of enactment of this Act.

SEC. 509. OUTER PLANETS EXPLORATION.

It is the sense of Congress that the outer solar system planets and their satellites can offer important knowledge about the formation and evolution of the solar system, the nature and diversity of these solar system bodies, and the potential for conditions conducive to life beyond Earth. NASA should move forward with plans for an Outer Planets flagship mission to the Europa-Jupiter system or the Titan-Saturn system as soon as practicable within a balanced Planetary Science program.

(a) IN GENERAL.—The International Space Station represents a significant investment of national resources, and it is a facility that embodies a cooperative international approach to the exploration and utilization of space. As such, it is important that its continued viability and productivity be ensured, to the maximum extent possible, after the Space Shuttle is retired.

(b) CONTINGENCY PLAN.—The Administrator shall develop a contingency plan and arrangements, including use of International Space Station international partner cargo resupply capabilities, to ensure the continued viability and productivity of the International Space Station in the event that United States commercial cargo resupply services are not available during any extended period after the date that the Space Shuttle is retired. The plan shall be delivered to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate not later than one year after the date of enactment of this Act.

SEC. 604. SENSE OF CONGRESS ON USE OF SPACE LIFE SCIENCES LABORATORY AT KENNEDY SPACE CENTER.

It is the sense of Congress that the Space Life Sciences Laboratory at Kennedy Space Center represents a key investment and asset in the International Space Station National Laboratory capability. The laboratory is specifically designed to provide pre-flight, in-flight, and post-flight support services for International Space Station end-users, and should be utilized in this manner when appropriate.

Subtitle B—Space Shuttle

SEC. 611. SPACE SHUTTLE FLIGHT REQUIREMENTS.

(a) REPORT ON U.S. HUMAN SPACEFLIGHT CAPABILITIES.—Section 501(c) of the National Aeronautics and Space Administration Authorization Act of 2005 (42 U.S.C. 16761(c)) is amended by striking the matter before paragraph (1) and inserting the following: “Not later than 90 days after the date of enactment of the National Aeronautics and Space Administration Authorization Act of 2008, the Administrator shall submit to the Committee on Commerce, Science, and Transportation of the Senate and the Committee on Science and Technology of the House of Representatives a report
on the lack of a United States human space flight system to replace
the Space Shuttle upon its planned retirement, currently scheduled
for 2010, and the ability of the United States to uphold the policy
described in subsection (a), including a description of—”.

(b) Baseline Manifest.—In addition to the Space Shuttle
flights listed as part of the baseline flight manifest as of January
1, 2008, the Utilization flights ULF–4 and ULF–5 shall be consid-
ered part of the Space Shuttle baseline flight manifest and shall
be flown prior to the retirement of the Space Shuttle, currently
scheduled for 2010.

(c) Additional Flight To Deliver the Alpha Magnetic
Spectrometer and Other Scientific Equipment and Payloads
to the International Space Station.—

(1) In General.—In addition to the flying of the baseline
manifest as described in subsection (b), the Administrator shall
take all necessary steps to fly one additional Space Shuttle
flight to deliver the Alpha Magnetic Spectrometer and other
scientific equipment and payloads to the International Space
Station prior to the retirement of the Space Shuttle. The pur-
pose of the mission required to be planned under this subsection
shall be to ensure the active use of the United States portion
of the International Space Station as a National Laboratory
by the delivery of the Alpha Magnetic Spectrometer, and to
the extent practicable, the delivery of flight-ready research
experiments prepared under the Memoranda of Understanding
between NASA and other entities to facilitate the utilization
of the International Space Station National Laboratory, as well
as other fundamental and applied life sciences and other micro-
gravity research experiments to the International Space Station
as soon as the assembly of the International Space Station
is completed.

(2) Flight Schedule.—If the Administrator, within 12
months before the scheduled date of the additional Space
Shuttle flight authorized by paragraph (1), determines that—
(A) NASA will be unable to meet that launch date
before the end of calendar year 2010, unless the President
decides to extend Shuttle operations beyond 2010, or
(B) implementation of the additional flight requirement
would, in and of itself, result in—
(i) significant increased costs to NASA over the
cost estimate of the additional flight as determined
by the Independent Program Assessment Office, or
(ii) unacceptable safety risks associated with
making the flight before termination of the Space
Shuttle program,

the Administrator shall notify the Senate Committee on Com-
merce, Science, and Transportation and the House of Represent-
atives Committee on Science and Technology of the determina-
tion, and provide a detailed explanation of the basis for that
determination. After the notification is provided to the Commit-
tees, the Administrator shall remove the flight from the Space
Shuttle schedule unless the Congress by law reauthorizes the
flight or the President certifies that it is in the national interest
to fly the mission.

(d) Termination or Suspension of Activities That Would
Preclude Continued Flight of Space Shuttle Prior To Review
By The Incoming 2009 Presidential Administration.—
(1) IN GENERAL.—The Administrator shall terminate or suspend any activity of the Agency that, if continued between the date of enactment of this Act and April 30, 2009, would preclude the continued safe and effective flight of the Space Shuttle after fiscal year 2010 if the President inaugurated on January 20, 2009, were to make a determination to delay the Space Shuttle’s scheduled retirement.

(2) REPORT ON IMPACT OF COMPLIANCE.—Within 90 days after the date of enactment of this Act, the Administrator shall provide a report to the Congress describing the expected budgetary and programmatic impacts from compliance with paragraph (1). The report shall include—

(A) a summary of the actions taken to ensure the option to continue space shuttle flights beyond the end of fiscal year 2010 is not precluded before April 30, 2009;

(B) an estimate of additional costs incurred by each specific action identified in the summary provided under subparagraph (A);

(C) a description of the proposed plan for allocating those costs among anticipated fiscal year 2009 appropriations or existing budget authority;

(D) a description of any programmatic impacts within the Space Operations Mission Directorate that would result from reallocations of funds to meet the requirements of paragraph (1);

(E) a description of any additional authority needed to enable compliance with the requirements of paragraph (1); and

(F) a description of any potential disruption to the timely progress of development milestones in the preparation of infrastructure or work-force requirements for shuttle follow-on launch systems.

(e) REPORT ON IMPACTS OF SPACE SHUTTLE EXTENSION.—Within 120 days after the date of enactment of this Act, the Administrator shall provide a report to the Congress outlining options, impacts, and associated costs of ensuring the safe and effective operation of the Space Shuttle at the minimum rate necessary to support International Space Station operations and resupply, including for both a near-term, 1-to-2 year extension of Space Shuttle operations and for a longer term, 3-to-6 year extension. The report shall include an assessment of—

(1) annual fixed and marginal costs, including identification and cost impacts of options for cost-sharing with the Constellation program and including the impact of those cost-sharing options on the Constellation program;

(2) the safety of continuing the use of the Space Shuttle beyond 2010, including a probability risk assessment of a catastrophic accident before completion of the extended Space Shuttle flight program, the underlying assumptions used in calculating that probability, and comparing the associated safety risks with those of other existing and planned human-rated launch systems, including the Soyuz and Constellation vehicles;

(3) a description of the activities and an estimate of the associated costs that would be needed to maintain or improve Space Shuttle safety throughout the periods described in the first sentence of this subsection were the President inaugurated
on January 20, 2009, to extend Space Shuttle operations beyond 2010, the currently anticipated date of Space Shuttle retirement;

(4) the impacts on facilities, workforce, and resources for the Constellation program and on the cost and schedule of that program;

(5) assumptions regarding workforce, skill mix, launch and processing infrastructure, training, ground support, orbiter maintenance and vehicle utilization, and other relevant factors, as appropriate, used in deriving the cost and schedule estimates for the options studied;

(6) the extent to which program management, processes, and workforce and contractor assignments can be integrated and streamlined for maximum efficiency to support continued shuttle flights while transitioning to the Constellation program, including identification of associated cost impacts on both the Space Shuttle and the Constellation program;

(7) the impact of a Space Shuttle flight program extension on the United States’ dependence on Russia for International Space Station crew rescue services; and

(8) the potential for enhancements of International Space Station research, logistics, and maintenance capabilities resulting from extended Shuttle flight operations and the costs associated with implementing any such enhancements.

SEC. 612. UNITED STATES COMMERCIAL CARGO CAPABILITY STATUS.

The Administrator shall determine the degree to which an increase in the amounts authorized to be appropriated under section 101(3) for the Commercial Orbital Transportation Services project to be used by Phase One team members of such project in fiscal year 2009 would reasonably be expected to accelerate development of Capabilities A, B, and C of such project to an effective operational capability as close to 2010 as possible.

SEC. 613. SPACE SHUTTLE TRANSITION.

(a) Disposition of Shuttle-Related Assets.—

(1) In general.—Not later than 90 days after the date of enactment of this Act, the Administrator shall submit to Congress a plan describing the process for the disposition of the remaining Space Shuttle Orbiters and other Space Shuttle program-related hardware after the retirement of the Space Shuttle fleet.

(2) Plan requirements.—The plan submitted under paragraph (1) shall include a description of a process by which educational institutions, science museums, and other appropriate organizations may acquire, through loan or disposal by the Federal Government, Space Shuttle program hardware.

(3) Prohibition on disposition before completion of plan.—The Administrator shall not dispose of any Space Shuttle program hardware before the plan required by paragraph (1) is submitted to Congress.

(b) Space Shuttle Transition Liaison Office.—

(1) Establishment.—The Administrator shall develop a plan and establish a Space Shuttle Transition Liaison Office within the Office of Human Capital Management of NASA to assist local communities affected by the termination of the Space Shuttle program in mitigating the negative impacts on such communities caused by such termination. The plan shall
define the size of the affected local community that would receive assistance described in paragraph (2).

(2) MANNER OF ASSISTANCE.—In providing assistance under paragraph (1), the office established under such paragraph shall—

(A) offer nonfinancial, technical assistance to communities described in such paragraph to assist in the mitigation described in such paragraph; and

(B) serve as a clearinghouse to assist such communities in identifying services available from other Federal, State, and local agencies to assist in such mitigation.

(3) TERMINATION OF OFFICE.—The office established under paragraph (1) shall terminate 2 years after the completion of the last Space Shuttle flight.

(4) SUBMISSION.—Not later than 180 days after the date of enactment of this Act, NASA shall provide a copy of the plan required by paragraph (1) to the Congress.

SEC. 614. AEROSPACE SKILLS RETENTION AND INVESTMENT REUTILIZATION REPORT.

(a) IN GENERAL.—The Administrator shall, in consultation with other Federal agencies, as appropriate—

(1) carry out an analysis of the facilities and human capital resources that will become available as a result of the retirement of the Space Shuttle program; and

(2) identify on-going or future Federal programs and projects that could use such facilities and resources.

(b) REPORT.—Not later than 180 days after the date of enactment of this Act, the Administrator shall submit to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report—

(1) on the analysis required by paragraph (1) of subsection (a), including the findings of the Administrator with respect to such analysis; and

(2) describing the programs and projects identified under paragraph (2) of such subsection.

SEC. 615. TEMPORARY CONTINUATION OF COVERAGE OF HEALTH BENEFITS.

(a) IN GENERAL.—Section 8905a(d) of title 5, United States Code, is amended by adding at the end the following new paragraph:

“(6)(A) If the basis for continued coverage under this section is, as a result of the termination of the Space Shuttle Program, an involuntary separation from a position due to a reduction-in-force or declination of a directed reassignment or transfer of function, or a voluntary separation from a surplus position in the National Aeronautics and Space Administration—

“(i) the individual shall be liable for not more than the employee contributions referred to in paragraph (1)(A)(i); and

“(ii) the National Aeronautics and Space Administration shall pay the remaining portion of the amount required under paragraph (1)(A).

(B) This paragraph shall only apply with respect to individuals whose continued coverage is based on a separation occurring on or after the date of enactment of this paragraph and before December 31, 2010.
“(C) For purposes of this paragraph, ‘surplus position’ means a position which is—
“(i) identified in pre-reduction-in-force planning as no longer required, and which is expected to be eliminated under formal reduction-in-force procedures as a result of the termination of the Space Shuttle Program; or
“(ii) encumbered by an employee who has received official certification from the National Aeronautics and Space Administration consistent with the Administration’s career transition assistance program regulations that the position is being abolished as a result of the termination of the Space Shuttle Program.”.

(b) Conforming Amendment.—Paragraph (1)(A) of such subsection (d) is amended by striking ‘‘(4) and (5)’’ and inserting ‘‘(4), (5), and (6)’’.

SEC. 616. ACCOUNTING REPORT.

Within 180 days after the date of enactment of this Act, the Administrator shall provide to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report that will summarize any actions taken or planned to be taken during fiscal years 2008 and 2009 to begin reductions in expenditures and activities related to the Space Shuttle program. The report shall include a summary of any actual or anticipated cost savings to the Space Shuttle program relative to the FY 2008 and FY 2009 Space Shuttle program budgets and runout projections as a result of such actions, as well as a summary of any actual or anticipated liens or budgetary challenges to the Space Shuttle program during fiscal years 2008 and 2009.

Subtitle C—Launch Services

SEC. 621. LAUNCH SERVICES STRATEGY.

(a) In General.—In preparation for the award of contracts to follow up on the current NASA Launch Services (NLS) contracts, the Administrator shall develop a strategy for providing domestic commercial launch services in support of NASA's small and medium-sized Science, Space Operations, and Exploration missions, consistent with current law and policy.

(b) Report.—The Administrator shall transmit a report to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate describing the strategy developed under subsection (a) not later than 90 days after the date of enactment of this Act. The report shall provide, at a minimum—

(1) the results of the Request for Information on small to medium-sized launch services released on April 22, 2008;

(3) the recommended alternatives, and associated 5-year budget plans starting in October 2010 that would enable their implementation; and
(4) a contingency plan in the event the recommended alternatives described in paragraph (3) are not available when needed.

TITLE VII—EDUCATION

SEC. 701. RESPONSE TO REVIEW.

(a) PLAN.—The Administrator shall prepare a plan identifying actions taken or planned in response to the recommendations of the National Academies report, “NASA’s Elementary and Secondary Education Program: Review and Critique”. For those actions that have not been implemented, the plan shall include a schedule and budget required to support the actions.

(a) REVIEW.—The Administrator shall make arrangements for an independent external review of the Explorer Schools program to evaluate its goals, status, plans, and accomplishments.

(b) REPORT.—The report of the independent external review shall be transmitted to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate not later than 1 year after the date of enactment of this Act.

SEC. 703. SENSE OF CONGRESS ON EARTHKAM AND ROBOTICS COMPETITIONS.

It is the sense of Congress that NASA’s educational programs are important sources of inspiration and hands-on learning for the next generation of engineers and scientists and should be supported. In that regard, programs such as EarthKAM, which brings NASA directly into American classrooms by enabling students to talk directly with astronauts aboard the International Space Station and to take photographs of Earth from space, and NASA involvement in robotics competitions for students of all levels, are particularly worthy undertakings and NASA should support them and look for additional opportunities to engage students through NASA’s space and aeronautics activities.

SEC. 704. ENHANCEMENT OF EDUCATIONAL ROLE OF NASA.

(a) SENSE OF CONGRESS.—It is the sense of Congress that the International Space Station offers a unique opportunity for Federal agencies to engage students in science, technology, engineering, and mathematics education. Congress encourages NASA to include other Federal agencies in its planning efforts to use the International Space Station National Laboratory for science, technology, engineering, and mathematics educational activities.

(b) EXPERIMENTAL PROGRAM TO STIMULATE COMPETITIVE RESEARCH.—In order to ensure that research expertise and talent throughout the Nation is developed and engaged in NASA research and education activities, NASA shall, as part of its annual budget submission, detail additional steps that can be taken to further
integrate the participating EPSCoR States in both existing and new or emerging NASA research programs and center activities.

(c) NATIONAL SPACE GRANT COLLEGE AND FELLOWSHIP PROGRAM.—NASA shall continue its emphasis on the importance of education to expand opportunities for Americans to understand and participate in NASA's aeronautics and space projects by supporting and enhancing science and engineering education, research, and public outreach efforts.

**TITLE VIII—NEAR-EARTH OBJECTS**

**SEC. 801. REAFFIRMATION OF POLICY.**

(a) REAFFIRMATION OF POLICY ON SURVEYING NEAR-EARTH ASTEROIDS AND COMETS.—Congress reaffirms the policy set forth in section 102(g) of the National Aeronautics and Space Act of 1958 (42 U.S.C. 2451(g)) (relating to surveying near-Earth asteroids and comets).

(b) SENSE OF CONGRESS ON BENEFITS OF NEAR-EARTH OBJECT PROGRAM ACTIVITIES.—It is the sense of Congress that the near-Earth object program activities of NASA will provide benefits to the scientific and exploration activities of NASA.

**SEC. 802. FINDINGS.**

Congress makes the following findings:

(1) Near-Earth objects pose a serious and credible threat to humankind, as many scientists believe that a major asteroid or comet was responsible for the mass extinction of the majority of the Earth's species, including the dinosaurs, nearly 65,000,000 years ago.

(2) Several such near-Earth objects have only been discovered within days of the objects' closest approach to Earth and recent discoveries of such large objects indicate that many large near-Earth objects remain undiscovered.

(3) Asteroid and comet collisions rank as one of the most costly natural disasters that can occur.

(4) The time needed to eliminate or mitigate the threat of a collision of a potentially hazardous near-Earth object with Earth is measured in decades.

(5) Unlike earthquakes and hurricanes, asteroids and comets can provide adequate collision information, enabling the United States to include both asteroid-collision and comet-collision disaster recovery and disaster avoidance in its public-safety structure.

(6) Basic information is needed for technical and policy decisionmaking for the United States to create a comprehensive program in order to be ready to eliminate and mitigate the serious and credible threats to humankind posed by potentially hazardous near-Earth asteroids and comets.

(7) As a first step to eliminate and to mitigate the risk of such collisions, situation and decision analysis processes, as well as procedures and system resources, must be in place well before a collision threat becomes known.

**SEC. 803. REQUESTS FOR INFORMATION.**

The Administrator shall issue requests for information on—
(1) a low-cost space mission with the purpose of rendezvousing with, attaching a tracking device, and characterizing the Apophis asteroid; and
(2) a medium-sized space mission with the purpose of detecting near-Earth objects equal to or greater than 140 meters in diameter.

SEC. 804. ESTABLISHMENT OF POLICY WITH RESPECT TO THREATS POSED BY NEAR-EARTH OBJECTS.
Within 2 years after the date of enactment of this Act, the Director of the OSTP shall—
(1) develop a policy for notifying Federal agencies and relevant emergency response institutions of an impending near-Earth object threat, if near-term public safety is at risk; and
(2) recommend a Federal agency or agencies to be responsible for—
(A) protecting the United States from a near-Earth object that is expected to collide with Earth; and
(B) implementing a deflection campaign, in consultation with international bodies, should one be necessary.

SEC. 805. PLANETARY RADAR CAPABILITY.
The Administrator shall maintain a planetary radar that is comparable to the capability provided through the Deep Space Network Goldstone facility of NASA.

SEC. 806. ARECIBO OBSERVATORY.
Congress reiterates its support for the use of the Arecibo Observatory for NASA-funded near-Earth object-related activities. The Administrator, using funds authorized in section 101(a)(1)(B), shall ensure the availability of the Arecibo Observatory’s planetary radar to support these activities until the National Academies’ review of NASA’s approach for the survey and deflection of near-Earth objects, including a determination of the role of Arecibo, that was directed to be undertaken by the Fiscal Year 2008 Omnibus Appropriations Act, is completed.

SEC. 807. INTERNATIONAL RESOURCES.
It is the sense of Congress that, since an estimated 25,000 asteroids of concern have yet to be discovered and monitored, the United States should seek to obtain commitments for cooperation from other nations with significant resources for contributing to a thorough and timely search for such objects and an identification of their characteristics.

TITLE IX—COMMERCIAL INITIATIVES

SEC. 901. SENSE OF CONGRESS.
It is the sense of Congress that a healthy and robust commercial sector can make significant contributions to the successful conduct of NASA’s space exploration program. While some activities are inherently governmental in nature, there are many other activities, such as routine supply of water, fuel, and other consumables to low Earth orbit or to destinations beyond low Earth orbit, and provision of power or communications services to lunar outposts, that potentially could be carried out effectively and efficiently by
the commercial sector at some point in the future. Congress encourages NASA to look for such service opportunities and, to the maximum extent practicable, make use of the commercial sector to provide those services. It is further the sense of Congress that United States entrepreneurial space companies have the potential to develop and deliver innovative technology solutions at affordable costs. NASA is encouraged to use United States entrepreneurial space companies to conduct appropriate research and development activities. NASA is further encouraged to seek ways to ensure that firms that rely on fixed-price proposals are not disadvantaged when NASA seeks to procure technology development.

SEC. 902. COMMERCIAL CREW INITIATIVE.

(a) IN GENERAL.—In order to stimulate commercial use of space, help maximize the utility and productivity of the International Space Station, and enable a commercial means of providing crew transfer and crew rescue services for the International Space Station, NASA shall—

(1) make use of United States commercially provided International Space Station crew transfer and crew rescue services to the maximum extent practicable, if those commercial services have demonstrated the capability to meet NASA-specified ascent, entry, and International Space Station proximity operations safety requirements;

(2) limit, to the maximum extent practicable, the use of the Crew Exploration Vehicle to missions carrying astronauts beyond low Earth orbit once commercial crew transfer and crew rescue services that meet safety requirements become operational;

(3) facilitate, to the maximum extent practicable, the transfer of NASA-developed technologies to potential United States commercial crew transfer and rescue service providers, consistent with United States law; and

(4) issue a notice of intent, not later than 180 days after the date of enactment of this Act, to enter into a funded, competitively awarded Space Act Agreement with 2 or more commercial entities for a Phase 1 Commercial Orbital Transportation Services crewed vehicle demonstration program.

(b) CONGRESSIONAL INTENT.—It is the intent of Congress that funding for the program described in subsection (a)(4) shall not come at the expense of full funding of the amounts authorized under section 101(3)(A), and for future fiscal years, for Orion Crew Exploration Vehicle development, Ares I Crew Launch Vehicle development, or International Space Station cargo delivery.

(c) ADDITIONAL TECHNOLOGIES.—NASA shall make International Space Station-compatible docking adaptors and other relevant technologies available to the commercial crew providers selected to service the International Space Station.

(d) CREW TRANSFER AND CREW RESCUE SERVICES CONTRACT.—If a commercial provider demonstrates the capability to provide International Space Station crew transfer and crew rescue services and to satisfy NASA ascent, entry, and International Space Station proximity operations safety requirements, NASA shall enter into an International Space Station crew transfer and crew rescue services contract with that commercial provider for a portion of NASA's anticipated International Space Station crew transfer and crew
rescue requirements from the time the commercial provider commences operations under contract with NASA through calendar year 2016, with an option to extend the period of performance through calendar year 2020.

**TITLE X—REVITALIZATION OF NASA INSTITUTIONAL CAPABILITIES**

SEC. 1001. REVIEW OF INFORMATION SECURITY CONTROLS.

(a) REPORT ON CONTROLS.—Not later than one year after the date of enactment of this Act, the Comptroller General shall transmit to the Committee on Science and Technology of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a review of information security controls that protect NASA's information technology resources and information from inadvertent or deliberate misuse, fraudulent use, disclosure, modification, or destruction. The review shall focus on networks servicing NASA's mission directorates. In assessing these controls, the review shall evaluate—

1. the network's ability to limit, detect, and monitor access to resources and information, thereby safeguarding and protecting them from unauthorized access;

SEC. 203. SECURITY COOPERATION WITH THE REPUBLIC OF KOREA.

(a) FINDINGS.—Congress makes the following findings:

1. Close and continuing defense cooperation between the United States and the Republic of Korea continues to be in the national security interest of the United States.

Congress has previously enacted important, special defense cooperation arrangements for the Republic of Korea, as in the Act entitled “An Act to authorize the transfer of items in the War Reserves Stockpile for Allies, Korea”, approved December 30, 2005 (Public Law 109–159; 119 Stat. 2955), which authorized the President, notwithstanding section 514 of the Foreign Assistance Act of 1961 (22 U.S.C. 2321h), to transfer to the Republic of Korea certain defense items to be included in a war reserve stockpile for that country.
(6) Enhanced support for defense cooperation with the Republic of Korea is important to the national security of the United States, including through creation of a status in law for the Republic of Korea similar to the countries in the North Atlantic Treaty Organization, Japan, Australia, and New Zealand, with respect to consideration by Congress of foreign military sales to the Republic of Korea.

by adding at end thereof the following:

“§ 20156. Railroad safety risk reduction program

“(a) IN GENERAL.—

“(1) PROGRAM REQUIREMENT.—Not later than 4 years after
the date of enactment of the Rail Safety Improvement Act
of 2008, the Secretary of Transportation, by regulation, shall
require each railroad carrier that is a Class I railroad, a railroad
carrier that has inadequate safety performance (as determined
by the Secretary), or a railroad carrier that provides intercity
rail passenger or commuter rail passenger transportation—

“(A) to develop a railroad safety risk reduction program
under subsection (d) that systematically evaluates railroad
safety risks on its system and manages those risks in
order to reduce the numbers and rates of railroad accidents,
incidents, injuries, and fatalities;

“(B) to submit its program, including any required
plans, to the Secretary for review and approval; and

“(C) to implement the program and plans approved
by the Secretary.

“(2) RELIANCE ON PILOT PROGRAM.—The Secretary may con-
duct behavior-based safety and other research, including pilot
programs, before promulgating regulations under this sub-
section and thereafter. The Secretary shall use any information
and experience gathered through such research and pilot pro-
grams under this subsection in developing regulations under
this section.

“(3) REVIEW AND APPROVAL.—The Secretary shall review
and approve or disapprove railroad safety risk reduction pro-
gram plans within a reasonable period of time. If the proposed
plan is not approved, the Secretary shall notify the affected
railroad carrier as to the specific areas in which the proposed plan is deficient, and the railroad carrier shall correct all deficiencies within a reasonable period of time following receipt of written notice from the Secretary. The Secretary shall annually conduct a review to ensure that the railroad carriers are complying with their plans.

"(4) VOLUNTARY COMPLIANCE.—A railroad carrier that is not required to submit a railroad safety risk reduction program under this section may voluntarily submit a program that meets the requirements of this section to the Secretary. The Secretary shall approve or disapprove any program submitted under this paragraph.

"(b) CERTIFICATION.—The chief official responsible for safety of each railroad carrier required to submit a railroad safety risk reduction program under subsection (a) shall certify that the contents of the program are accurate and that the railroad carrier will implement the contents of the program as approved by the Secretary.

"(c) RISK ANALYSIS.—In developing its railroad safety risk reduction program each railroad carrier required to submit such a program pursuant to subsection (a) shall identify and analyze the aspects of its railroad, including operating rules and practices, infrastructure, equipment, employee levels and schedules, safety culture, management structure, employee training, and other matters, including those not covered by railroad safety regulations or other Federal regulations, that impact railroad safety.

"(d) PROGRAM ELEMENTS.—

"(1) IN GENERAL.—Each railroad carrier required to submit a railroad safety risk reduction program under subsection (a) shall develop a comprehensive safety risk reduction program to improve safety by reducing the number and rates of accidents, incidents, injuries, and fatalities that is based on the risk analysis required by subsection (c) through—

"(A) the mitigation of aspects that increase risks to railroad safety; and

"(B) the enhancement of aspects that decrease risks to railroad safety.

"(2) REQUIRED COMPONENTS.—Each railroad carrier's safety risk reduction program shall include a risk mitigation plan in accordance with this section, a technology implementation plan that meets the requirements of subsection (e), and a fatigue management plan that meets the requirements of subsection (f).

"(e) TECHNOLOGY IMPLEMENTATION PLAN.—

"(1) IN GENERAL.—As part of its railroad safety risk reduction program, a railroad carrier required to submit a railroad safety risk reduction program under subsection (a) shall develop, and periodically update as necessary, a 10-year technology implementation plan that describes the railroad carrier's plan for development, adoption, implementation, maintenance, and use of current, new, or novel technologies on its system over a 10-year period to reduce safety risks identified under the railroad safety risk reduction program. Any updates to the plan are subject to review and approval by the Secretary.

"(2) TECHNOLOGY ANALYSIS.—A railroad carrier's technology implementation plan shall include an analysis of the safety impact, feasibility, and cost and benefits of implementing
technologies, including processor-based technologies, positive train control systems (as defined in section 20157(i)), electronically controlled pneumatic brakes, rail integrity inspection systems, rail integrity warning systems, switch position monitors and indicators, trespasser prevention technology, highway-rail grade crossing technology, and other new or novel railroad safety technology, as appropriate, that may mitigate risks to railroad safety identified in the risk analysis required by subsection (c).

“(3) IMPLEMENTATION SCHEDULE.—A railroad carrier’s technology implementation plan shall contain a prioritized implementation schedule for the development, adoption, implementation, and use of current, new, or novel technologies on its system to reduce safety risks identified under the railroad safety risk reduction program.

“(4) POSITIVE TRAIN CONTROL.—Except as required by section 20157 (relating to the requirements for implementation of positive train control systems), the Secretary shall ensure that—

“(A) each railroad carrier’s technology implementation plan required under paragraph (1) that includes a schedule for implementation of a positive train control system complies with that schedule; and

“(B) each railroad carrier required to submit such a plan implements a positive train control system pursuant to such plan by December 31, 2018.

“(f) FATIGUE MANAGEMENT PLAN.—

“(1) IN GENERAL.—As part of its railroad safety risk reduction program, a railroad carrier required to submit a railroad safety risk reduction program under subsection (a) shall develop and update at least once every 2 years a fatigue management plan that is designed to reduce the fatigue experienced by safety-related railroad employees and to reduce the likelihood of accidents, incidents, injuries, and fatalities caused by fatigue. Any such update shall be subject to review and approval by the Secretary.

“(2) TARGETED FATIGUE COUNTERMEASURES.—A railroad carrier’s fatigue management plan shall take into account the varying circumstances of operations by the railroad on different parts of its system, and shall prescribe appropriate fatigue countermeasures to address those varying circumstances.

“(3) ADDITIONAL ELEMENTS.—A railroad shall consider the need to include in its fatigue management plan elements addressing each of the following items, as applicable:

“(A) Employee education and training on the physiological and human factors that affect fatigue, as well as strategies to reduce or mitigate the effects of fatigue, based on the most current scientific and medical research and literature.

“(B) Opportunities for identification, diagnosis, and treatment of any medical condition that may affect alertness or fatigue, including sleep disorders.

“(C) Effects on employee fatigue of an employee’s short-term or sustained response to emergency situations, such as derailments and natural disasters, or engagement in other intensive working conditions.
“(D) Scheduling practices for employees, including innovative scheduling practices, on-duty call practices, work and rest cycles, increased consecutive days off for employees, changes in shift patterns, appropriate scheduling practices for varying types of work, and other aspects of employee scheduling that would reduce employee fatigue and cumulative sleep loss.

“(E) Methods to minimize accidents and incidents that occur as a result of working at times when scientific and medical research have shown increased fatigue disrupts employees’ circadian rhythm.

“(F) Alertness strategies, such as policies on napping, to address acute drowsiness and fatigue while an employee is on duty.

“(G) Opportunities to obtain restful sleep at lodging facilities, including employee sleeping quarters provided by the railroad carrier.

“(H) The increase of the number of consecutive hours of off-duty rest, during which an employee receives no communication from the employing railroad carrier or its managers, supervisors, officers, or agents.

“(I) Avoidance of abrupt changes in rest cycles for employees.

“(J) Additional elements that the Secretary considers appropriate.

“(g) CONSENSUS.—

“(1) IN GENERAL.—Each railroad carrier required to submit a railroad safety risk reduction program under subsection (a) shall consult with, employ good faith and use its best efforts to reach agreement with, all of its directly affected employees, including any non-profit employee labor organization representing a class or craft of directly affected employees of the railroad carrier, on the contents of the safety risk reduction program.

“(2) STATEMENT.—If the railroad carrier and its directly affected employees, including any nonprofit employee labor organization representing a class or craft of directly affected employees of the railroad carrier, cannot reach consensus on the proposed contents of the plan, then directly affected employees and such organization may file a statement with the Secretary explaining their views on the plan on which consensus was not reached. The Secretary shall consider such views during review and approval of the program.

“(h) ENFORCEMENT.—The Secretary shall have the authority to assess civil penalties pursuant to chapter 213 for a violation of this section, including the failure to submit, certify, or comply with a safety risk reduction program, risk mitigation plan, technology implementation plan, or fatigue management plan.”.

(A) its main line over which intercity rail passenger transportation or commuter rail passenger transportation, as defined in section 24102, is regularly provided;

(B) its main line over which poison- or toxic-by-inhalation hazardous materials, as defined in parts 171.8, 173.115, and 173.132 of title 49, Code of Federal Regulations, are transported; and

(C) such other tracks as the Secretary may prescribe by regulation or order.

(2) IMPLEMENTATION.—The plan shall describe how it will provide for interoperability of the system with movements of trains of other railroad carriers over its lines and shall, to the extent practical, implement the system in a manner that addresses areas of greater risk before areas of lesser risk. The railroad carrier shall implement a positive train control system in accordance with the plan.

(b) TECHNICAL ASSISTANCE.—The Secretary may provide technical assistance and guidance to railroad carriers in developing the plans required under subsection (a).

(f) OTHER RAILROAD CARRIERS.—Nothing in this section restricts the discretion of the Secretary to require railroad carriers other than those specified in subsection (a) to implement a positive train control system pursuant to this section or section 20156, or to specify the period by which implementation shall occur that does not exceed the time limits established in this section or section 20156. In exercising such discretion, the Secretary shall, at a minimum, consider the risk to railroad employees and the public associated with the operations of the railroad carrier.
“(g) REGULATIONS.—The Secretary shall prescribe regulations or issue orders necessary to implement this section, including regulations specifying in appropriate technical detail the essential functionalities of positive train control systems, and the means by which those systems will be qualified.

“(h) CERTIFICATION.—The Secretary shall not permit the installation of any positive train control system or component in revenue service unless the Secretary has certified that any such system or component has been approved through the approval process set forth in part 236 of title 49, Code of Federal Regulations, and complies with the requirements of that part.

“(i) DEFINITIONS.—In this section:

“(1) INTEROPERABILITY.—The term ‘interoperability’ means the ability to control locomotives of the host railroad and tenant railroad to communicate with and respond to the positive train control system, including uninterrupted movements over property boundaries.

“(2) MAIN LINE.—The term ‘main line’ means a segment or route of railroad tracks over which 5,000,000 or more gross tons of railroad traffic is transported annually, except that—

“(A) the Secretary may, through regulations under subsection (g), designate additional tracks as main line as appropriate for this section; and

“(B) for intercity rail passenger transportation or commuter rail passenger transportation routes or segments over which limited or no freight railroad operations occur, the Secretary shall define the term ‘main line’ by regulation.

“(3) POSITIVE TRAIN CONTROL SYSTEM.—The term ‘positive train control system’ means a system designed to prevent train-to-train collisions, over-speed derailments, incursions into established work zone limits, and the movement of a train through a switch left in the wrong position.”.

“(4) for signal employees—

“(A) to limit or eliminate the amount of time that is considered to be neither on duty nor off duty under this chapter that an employee spends returning from an outlying worksite after scheduled duty hours or returning from a trouble call to the employee’s headquarters or directly to the employee’s residence; and

“(B) to increase the amount of time that constitutes a release period, that does not break the continuity of service and is considered time off duty; and

“(5) to require other changes to railroad operating and scheduling practices, including unscheduled duty calls, that could affect employee fatigue and railroad safety.

“(b) REGULATIONS GOVERNING THE HOURS OF SERVICE OF TRAIN EMPLOYEES OF COMMUTER AND INTERCITY PASSENGER RAILROAD CARRIERS.—Within 3 years after the date of enactment of the Rail Safety Improvement Act of 2008, the Secretary shall prescribe regulations and issue orders to establish hours of service requirements for train employees engaged in commuter rail passenger transportation and intercity rail passenger transportation (as defined in section 24102 of this title) that may differ from the requirements of this chapter. SEC. 210. FOSTERING INTRODUCTION OF NEW TECHNOLOGY TO IMPROVE SAFETY AT HIGHWAY-RAIL GRADE CROSSINGS.

(a) AMENDMENT.—Subchapter II of chapter 201, as amended by section 204 of this division, is further amended by adding at the end the following:

“§ 20161. Fostering introduction of new technology to improve safety at highway-rail grade crossings

“(a) FINDINGS.—
“(1) Collisions between highway users and trains at highway-rail grade crossings continue to cause an unacceptable loss of life, serious personal injury, and property damage.
“(2) While elimination of at-grade crossings through consolidation of crossings and grade separations offers the greatest long-term promise for optimizing the safety and efficiency of the two modes of transportation, over 140,000 public grade crossings remain on the general rail system—approximately one for each route mile on the general rail system.
“(3) Conventional highway traffic control devices such as flashing lights and gates are often effective in warning motorists of a train’s approach to an equipped crossing.
“(4) Since enactment of the Highway Safety Act of 1973, over $4,200,000,000 of Federal funding has been invested in safety improvements at highway-rail grade crossings, yet a majority of public highway-rail grade crossings are not yet equipped with active warning systems.
“(5) The emergence of new technologies presents opportunities for more effective and affordable warnings and safer passage of highway users and trains at remaining highway-rail grade crossings.
“(6) Implementation of new crossing safety technology will require extensive cooperation between highway authorities and railroad carriers.

“(7) Federal Railroad Administration regulations establishing performance standards for processor-based signal and train control systems provide a suitable framework for qualification of new or novel technology at highway-rail grade crossings, and the Federal Highway Administration’s Manual on Uniform Traffic Control Devices provides an appropriate means of determining highway user interface with such new technology.

“(b) POLICY.—It is the policy of the United States to encourage the development of new technology that can prevent loss of life and injuries at highway-rail grade crossings. The Secretary of Transportation is designated to carry out this policy in consultation with States and necessary public and private entities.

“(c) SUBMISSION OF NEW TECHNOLOGY PROPOSALS.—Railroad carriers and railroad suppliers may submit for review and approval to the Secretary such new technology designed to improve safety at highway-rail grade crossings. The Secretary shall approve by order the new technology designed to improve safety at highway-rail grade crossings in accordance with Federal Railroad Administration standards for the development and use of processor-based signal and train control systems and shall consider the effects on safety of highway-user interface with the new technology.

“(d) EFFECT OF SECRETARIAL APPROVAL.—If the Secretary approves by order new technology to provide warning to highway users at a highway-rail grade crossing and such technology is installed at a highway-rail grade crossing in accordance with the conditions of the approval, this determination preempts any State statute or regulation concerning the adequacy of the technology in providing warning at the crossing.”.

(b) CONFORMING AMENDMENT.—The chapter analysis for chapter 201, as amended by section 204 of this division, is further amended by inserting after the item relating to section 20160, the following:

“20161. Fostering introduction of new technology to improve safety at highway-rail grade crossings.”.

‘(c) STANDARD FOR REVIEW.—

‘(1) The Board may only issue a land-use exemption if it determines that the facility at the existing or proposed location does not pose an unreasonable risk to public health, safety, or the environment. In deciding whether a solid waste rail transfer facility that is or proposed to be constructed or operated by or on behalf of a rail carrier poses an unreasonable risk to public health, safety, or the environment, the Board shall weigh the particular facility’s potential benefits to and the adverse impacts on public health, public safety, the environment, interstate commerce, and transportation of solid waste by rail.

‘(2) The Board may not grant a land-use exemption for a solid waste rail transfer facility proposed to be located on land within any unit of or land affiliated with the National Park System, the National Wildlife Refuge System, the National Wilderness Preservation System, the National Trails System, the National Wild and Scenic Rivers System, a National Reserve, a National Monument, or lands referenced in Public Law 108–421 for which a State has implemented a conservation management plan, if operation of the facility would be inconsistent with restrictions placed on such land.

‘(d) CONSIDERATIONS.—When evaluating an application under this section, the Board shall consider and give due weight to the following, as applicable:

‘(1) the land-use, zoning, and siting regulations or solid waste planning requirements of the State or State subdivision in which the facility is or will be located that are applicable to solid waste transfer facilities, including those that are not owned or operated by or on behalf of a rail carrier;

‘(2) the land-use, zoning, and siting regulations or solid waste planning requirements applicable to the property where the solid waste rail transfer facility is proposed to be located;

‘(3) regional transportation planning requirements developed pursuant to Federal and State law;

‘(4) regional solid waste disposal plans developed pursuant to State or Federal law;

‘(5) any Federal and State environmental protection laws or regulations applicable to the site;

‘(6) any unreasonable burdens imposed on the interstate transportation of solid waste by railroad, or the potential for discrimination against the railroad transportation of solid waste, a solid waste rail transfer facility, or a rail carrier that owns or operates such a facility; and

‘(7) any other relevant factors, as determined by the Board.

‘(e) EXISTING FACILITIES.—Upon the granting of petition from the State in which a solid waste rail transfer facility is operating as of the date of enactment of the Clean Railroads Act of 2008 by the Board, the facility shall submit a complete application for a siting permit to the Board pursuant to the procedures issued pursuant to subsection (b). No State may enforce a law, regulation, order, or other requirement affecting the siting of a facility that is operating as of the date of enactment of the Clean Railroads
Act of 2008 until the Board has approved or denied a permit pursuant to subsection (c).

“(f) Effect of Land-Use Exemption.—If the Board grants a land-use exemption to a solid waste rail transfer facility, all State laws, regulations, orders, or other requirements affecting the siting of a facility are preempted with regard to that facility. An exemption may require compliance with such State laws, regulations, orders, or other requirements.

“(g) Injunctive Relief.—Nothing in this section precludes a person from seeking an injunction to enjoin a solid waste rail transfer facility from being constructed or operated by or on behalf of a rail carrier if that facility has materially violated, or will materially violate, its land-use exemption or if it failed to receive a valid land-use exemption under this section.

“(h) Fees.—The Board may charge permit applicants reasonable fees to implement this section, including the costs of third-party consultants.

“(i) Definitions.—In this section the terms ‘solid waste’, ‘solid waste rail transfer facility’, and ‘State requirements’ have the meaning given such terms in section 10908(e).”.

“(b) Conforming Amendment.—The chapter analysis for chapter 109, as amended by section 603 of this division, is amended by inserting after the item relating to section 10908 the following:

“10909. Solid waste rail transfer facility land-use exemption.”

SEC. 207. METRICS AND STANDARDS.

(a) IN GENERAL.—Within 180 days after the date of enactment of this Act, the Federal Railroad Administration and Amtrak shall jointly, in consultation with the Surface Transportation Board, rail carriers over whose rail lines Amtrak trains operate, States, Amtrak employees, nonprofit employee organizations representing Amtrak employees, and groups representing Amtrak passengers, as appropriate, develop new or improve existing metrics and minimum standards for measuring the performance and service quality of intercity passenger train operations, including cost recovery, on-time performance and minutes of delay, ridership, on-board services, stations, facilities, equipment, and other services. Such metrics, at a minimum, shall include the percentage of avoidable and fully allocated operating costs covered by passenger revenues on each route, ridership per train mile operated, measures of on-time performance and delays incurred by intercity passenger trains on the rail lines of each rail carrier and, for long-distance routes, measures of connectivity with other routes in all regions currently receiving Amtrak service and the transportation needs of communities and populations that are not well-served by other forms of intercity transportation. Amtrak shall provide reasonable access to the Federal Railroad Administration in order to enable the Administration to carry out its duty under this section.

(b) QUARTERLY REPORTS.—The Administrator of the Federal Railroad Administration shall collect the necessary data and publish
a quarterly report on the performance and service quality of intercity passenger train operations, including Amtrak’s cost recovery, ridership, on-time performance and minutes of delay, causes of delay, on-board services, stations, facilities, equipment, and other services.

(c) **Contracts With Host Rail Carriers.**—To the extent practicable, Amtrak and its host rail carriers shall incorporate the metrics and standards developed under subsection (a) into their access and service agreements.

(d) **Arbitration.**—If the development of the metrics and standards is not completed within the 180-day period required by subsection (a), any party involved in the development of those standards may petition the Surface Transportation Board to appoint an arbitrator to assist the parties in resolving their disputes through binding arbitration.

**SEC. 208. METHODOLOGIES FOR AMTRAK ROUTE AND SERVICE PLANNING DECISIONS.**

(a) **Methodology Development.**—Within 180 days after the date of enactment of this Act, the Federal Railroad Administration shall obtain the services of a qualified independent entity to develop and recommend objective methodologies for Amtrak to use in determining what intercity passenger routes and services it will provide, including the establishment of new routes, the elimination of existing routes, and the contraction or expansion of services or frequencies over such routes. In developing such methodologies, the entity shall consider—

1. the current or expected performance and service quality of intercity passenger train operations, including cost recovery, on-time performance and minutes of delay, ridership, on-board services, stations, facilities, equipment, and other services;
2. the connectivity of a route with other routes;
3. the transportation needs of communities and populations that are not well served by intercity passenger rail service or by other forms of intercity transportation;
4. Amtrak’s and other major intercity passenger rail service providers in other countries’ methodologies for determining intercity passenger rail routes and services; and
5. the views of the States and other interested parties.

(b) **Submittal to Congress.**—Within 1 year after the date of enactment of this Act, the entity shall submit recommendations developed under subsection (a) to Amtrak, the Committee on Transportation and Infrastructure of the House of Representatives, and the Committee on Commerce, Science, and Transportation of the Senate.

(c) **Consideration of Recommendations.**—Within 90 days after receiving the recommendations developed under subsection (a) by the entity, the Amtrak Board of Directors shall consider the adoption of those recommendations. The Board shall transmit a report to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate explaining its reasons for adopting or not adopting the recommendations.

**SEC. 209. STATE-SUPPORTED ROUTES.**

(a) **In General.**—Within 2 years after the date of enactment of this Act, the Amtrak Board of Directors, in consultation with the Secretary, the governors of each relevant State, and the Mayor...
of the District of Columbia, or entities representing those officials, shall develop and implement a single, nationwide standardized methodology for establishing and allocating the operating and capital costs among the States and Amtrak associated with trains operated on each of the routes described in section 24102(5)(B) and (D) and section 24702 that—

(1) ensures, within 5 years after the date of enactment of this Act, equal treatment in the provision of like services of all States and groups of States (including the District of Columbia); and

(2) allocates to each route the costs incurred only for the benefit of that route and a proportionate share, based upon factors that reasonably reflect relative use, of costs incurred for the common benefit of more than 1 route.

(b) REVISIONS.—The Amtrak Board of Directors, in consultation with the Secretary, the governors of each relevant State, and the Mayor of the District of Columbia, or entities representing those officials, may revise or amend the methodology established under subsection (a) as necessary, consistent with the intent of this section, including revisions or modifications based on Amtrak’s financial accounting system developed pursuant to section 203 of this division.

(c) REVIEW.—If Amtrak and the States (including the District of Columbia) in which Amtrak operates such routes do not voluntarily adopt and implement the methodology developed under subsection (a) in allocating costs and determining compensation for the provision of service in accordance with the date established therein, the Surface Transportation Board shall determine the appropriate methodology required under subsection (a) for such services in accordance with the procedures and procedural schedule applicable to a proceeding under section 24904(c) of title 49, United States Code, and require the full implementation of this methodology with regards to the provision of such service within 1 year after the Board’s determination of the appropriate methodology.

SEC. 213. PASSENGER TRAIN PERFORMANCE.
(a) IN GENERAL.—Section 24308 is amended by adding at the end the following:
   "(f) PASSENGER TRAIN PERFORMANCE AND OTHER STANDARDS.—
   "(1) INVESTIGATION OF SUBSTANDARD PERFORMANCE.—If the on-time performance of any intercity passenger train averages less than 80 percent for any 2 consecutive calendar quarters, or the service quality of intercity passenger train operations for which minimum standards are established under section 207 of the Passenger Rail Investment and Improvement Act of 2008 fails to meet those standards for 2 consecutive calendar quarters, the Surface Transportation Board (referred to in this section as the 'Board') may initiate an investigation, or upon the filing of a complaint by Amtrak, an intercity passenger rail operator, a host freight railroad over which Amtrak operates, or an entity for which Amtrak operates intercity passenger rail service, the Board shall initiate such an investigation,
to determine whether and to what extent delays or failure to achieve minimum standards are due to causes that could reasonably be addressed by a rail carrier over whose tracks the intercity passenger train operates or reasonably addressed by Amtrak or other intercity passenger rail operators. As part of its investigation, the Board has authority to review the accuracy of the train performance data and the extent to which scheduling and congestion contribute to delays. In making its determination or carrying out such an investigation, the Board shall obtain information from all parties involved and identify reasonable measures and make recommendations to improve the service, quality, and on-time performance of the train.

“(2) PROBLEMS CAUSED BY HOST RAIL CARRIER.—If the Board determines that delays or failures to achieve minimum standards investigated under paragraph (1) are attributable to a rail carrier's failure to provide preference to Amtrak over freight transportation as required under subsection (c), the Board may award damages against the host rail carrier, including prescribing such other relief to Amtrak as it determines to be reasonable and appropriate pursuant to paragraph (3) of this subsection.

“(3) DAMAGES AND RELIEF.—In awarding damages and prescribing other relief under this subsection the Board shall consider such factors as—

“(A) the extent to which Amtrak suffers financial loss as a result of host rail carrier delays or failure to achieve minimum standards; and

“(B) what reasonable measures would adequately deter future actions which may reasonably be expected to be likely to result in delays to Amtrak on the route involved.

“(4) USE OF DAMAGES.—The Board shall, as it deems appropriate, order the host rail carrier to remit the damages awarded under this subsection to Amtrak or to an entity for which Amtrak operates intercity passenger rail service. Such damages shall be used for capital or operating expenditures on the routes over which delays or failures to achieve minimum standards were the result of a rail carrier's failure to provide preference to Amtrak over freight transportation as determined in accordance with paragraph (2).”.

(b) FEES.—The Surface Transportation Board may establish and collect filing fees from any entity that files a complaint under section 24308(f)(1) of title 49, United States Code, or otherwise requests or requires the Board's services pursuant to this division. The Board shall establish such fees at levels that will fully or partially, as the Board determines to be appropriate, offset the costs of adjudicating complaints under that section and other requests or requirements for Board action under this division. The Board may waive any fee established under this subsection for any governmental entity as determined appropriate by the Board.

(c) AUTHORIZATION OF ADDITIONAL STAFF.—The Surface Transportation Board may increase the number of Board employees by up to 15 for the 5 fiscal year period beginning with fiscal year 2009 to carry out its responsibilities under section 24308 of title 49, United States Code, and this division.

(d) CHANGE OF REFERENCE.—Section 24308 is amended—

(1) by striking “Interstate Commerce Commission” in subsection (a)(2)(A) and inserting “Surface Transportation Board”;
(2) by striking "Commission" each place it appears and inserting "Board";
(3) by striking "Secretary of Transportation" in subsection (c) and inserting "Board"; and
(4) by striking "Secretary" the last 3 places it appears in subsection (c) and each place it appears in subsections (d) and (e) and inserting "Board".

“(a) IN GENERAL.—Within 1 year after the date of enactment of the Passenger Rail Investment and Improvement Act of 2008, the Federal Railroad Administration shall complete a rulemaking proceeding to develop a pilot program that—

“(1) permits a rail carrier or rail carriers that own infrastructure over which Amtrak operates a passenger rail service route described in subparagraph (B), (C), or (D) of section 24102(5) or in section 24702 to petition the Administration to be considered as a passenger rail service provider over that route in lieu of Amtrak for a period not to exceed 5 years after the date of enactment of the Passenger Rail Investment and Improvement Act of 2008;

“(2) requires the Administration to notify Amtrak within 30 days after receiving a petition under paragraph (1) and establish a deadline by which both the petitioner and Amtrak would be required to submit a bid to provide passenger rail service over the route to which the petition relates;

“(3) requires that each bid describe how the bidder would operate the route, what Amtrak passenger equipment would be needed, if any, what sources of non-Federal funding the bidder would use, including any State subsidy, among other things;

“(4) requires the Administration to select winning bidders by evaluating the bids against the financial and performance metrics developed under section 207 of the Passenger Rail Investment and Improvement Act of 2008 and to give preference in awarding contracts to bidders seeking to operate routes that have been identified as one of the five worst performing Amtrak routes under section 24710;

“(5) requires the Administration to execute a contract within a specified, limited time after the deadline established under paragraph (2) and award to the winning bidder—

“(A) the right and obligation to provide passenger rail service over that route subject to such performance standards as the Administration may require, consistent with the standards developed under section 207 of the Passenger Rail Investment and Improvement Act of 2008; and

“(B) an operating subsidy—

“(i) for the first year at a level not in excess of the level in effect during the fiscal year preceding the fiscal year in which the petition was received, adjusted for inflation;

“(ii) for any subsequent years at such level, adjusted for inflation; and
“(6) requires that each bid contain a staffing plan describing the number of employees needed to operate the service, the job assignments and requirements, and the terms of work for prospective and current employees of the bidder for the service outlined in the bid, and such staffing plan be made available by the winning bidder to the public after the bid award.

“(b) Route Limitations.—The Administration may not make the program available with respect to more than 2 Amtrak intercity passenger rail routes.

“(c) Performance Standards; Access to Facilities; Employees.—If the Administration awards the right and obligation to provide passenger rail service over a route under the program to a rail carrier or rail carriers—

“(1) it shall execute a contract with the rail carrier or rail carriers for rail passenger operations on that route that conditions the operating and subsidy rights upon—

“(A) the service provider continuing to provide passenger rail service on the route that is no less frequent, nor over a shorter distance, than Amtrak provided on that route before the award; and

“(B) the service provider’s compliance with the minimum standards established under section 207 of the Passenger Rail Investment and Improvement Act of 2008 and such additional performance standards as the Administration may establish;

“(2) it shall, if the award is made to a rail carrier other than Amtrak, require Amtrak to provide access to its reservation system, stations, and facilities directly related to operations to any rail carrier or rail carriers awarded a contract under this section, in accordance with section 217 of that Act, necessary to carry out the purposes of this section;

“(3) the employees of any person used by a rail carrier or rail carriers (as defined in section 10102(5) of this title) in the operation of a route under this section shall be considered an employee of that carrier or carriers and subject to the applicable Federal laws and regulations governing similar crafts or classes of employees of Amtrak, including provisions under section 121 of the Amtrak Reform and Accountability Act of 1997 relating to employees that provide food and beverage service; and

“(4) the winning bidder shall provide hiring preference to qualified Amtrak employees displaced by the award of the bid, consistent with the staffing plan submitted by the bidder and shall be subject to the grant conditions under section 24405 of this title.

“(d) Cessation of Service.—If a rail carrier or rail carriers awarded a route under this section cease to operate the service or fail to fulfill their obligations under the contract required under subsection (c), the Administrator, in collaboration with the Surface Transportation Board, shall take any necessary action consistent with this title to enforce the contract and ensure the continued provision of service, including the installment of an interim service provider and re-bidding the contract to operate the service. The entity providing service shall either be Amtrak or a rail carrier defined in subsection (a)(1).

“(e) Adequate Resources.—Before taking any action allowed under this section, the Secretary shall certify that the Administrator
has sufficient resources that are adequate to undertake the program established under this section.

(b) REPORT.—Within 1 year after the conclusion of the pilot program established under subsection (a), the Federal Railroad Administration shall submit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report on the results on the pilot program established under section 24711, and any recommendations for further action.

(c) CONFORMING AMENDMENT.—The chapter analysis for chapter 247, as amended by section 210, is amended by inserting after the item relating to section 24710 the following:

"24711. Alternate passenger rail service pilot program."

(a) PROVISION OF FINANCIAL INCENTIVES.—For Amtrak employees who are adversely affected by the cessation of the operation of a long-distance route or any other route under section 24711 of title 49, United States Code, previously operated by Amtrak, the Secretary shall develop a program under which the Secretary may, at the Secretary's discretion, provide grants for financial incentives to be provided to Amtrak employees who voluntarily terminate their employment with Amtrak and relinquish any legal rights to receive termination-related payments under any contractual agreement with Amtrak.

(b) CONDITIONS FOR FINANCIAL INCENTIVES.—As a condition for receiving financial assistance grants under this section, Amtrak must certify that—

(1) a reasonable attempt was made to reassign an employee adversely affected under section 24711 of title 49, United States Code, or by the elimination of any route, to other positions within Amtrak in accordance with any contractual agreements;

(2) the financial assistance results in a net reduction in the total number of employees equal to the number receiving financial incentives;

(3) the financial assistance results in a net reduction in total employment expense equivalent to the total employment expenses associated with the employees receiving financial incentives; and

(4) the total number of employees eligible for termination-related payments will not be increased without the express written consent of the Secretary.

(c) AMOUNT OF FINANCIAL INCENTIVES.—The financial incentives authorized under this section may be no greater than $100,000 per employee.

(d) AUTHORIZATION OF APPROPRIATIONS.—There are hereby authorized to be appropriated to the Secretary such sums as may be necessary to make grants to Amtrak to provide financial incentives under subsection (a).

(e) TERMINATION-RELATED PAYMENTS.—If Amtrak employees adversely affected by the cessation of Amtrak service resulting from the awarding of a grant to an operator other than Amtrak for the operation of a route under section 24711 of title 49, United States Code, or any other route, previously operated by Amtrak do not receive financial incentives under subsection (a), then the Secretary shall make grants to Amtrak from funds authorized by

"24711. Alternate passenger rail service pilot program."
section 101 of this division for termination-related payments to employees under existing contractual agreements.

SEC. 216. SPECIAL PASSENGER TRAINS.

Amtrak is encouraged to increase the operation of special trains funded by, or in partnership with, private sector operators through competitive contracting to minimize the need for Federal subsidies. Amtrak shall utilize the provisions of section 24308 of title 49, United States Code, when necessary to obtain access to facilities, train and engine crews, or services of a rail carrier or regional transportation authority that are required to operate such trains.

SEC. 217. ACCESS TO AMTRAK EQUIPMENT AND SERVICES.

If a State desires to select or selects an entity other than Amtrak to provide services required for the operation of an intercity passenger train route described in section 24102(5)(D) or 24702 of title 49, United States Code, the State may make an agreement with Amtrak to use facilities and equipment of, or have services provided by, Amtrak under terms agreed to by the State and Amtrak to enable the State to utilize an entity other than Amtrak to provide services required for operation of the route. If the parties cannot agree upon terms, and the Surface Transportation Board finds that access to Amtrak’s facilities or equipment, or the provision of services by Amtrak, is necessary to carry out this provision and that the operation of Amtrak’s other services will not be impaired thereby, the Surface Transportation Board shall, within 120 days after submission of the dispute, issue an order that the facilities and equipment be made available, and that services be provided, by Amtrak, and shall determine reasonable compensation, liability, and other terms for use of the facilities and equipment and provision of the services. Compensation shall be determined, as appropriate, in accordance with the methodology established pursuant to section 209 of this division, if available.

SEC. 218. GENERAL AMTRAK PROVISIONS.

SEC. 219. STUDY OF COMPLIANCE REQUIREMENTS AT EXISTING INTERCITY RAIL STATIONS.

(a) IN GENERAL.—Amtrak, in consultation with station owners and other railroads operating service through the existing stations that it serves, shall evaluate the improvements necessary to make these stations readily accessible to and usable by individuals with disabilities, as required by such section 242(e)(2) of the Americans with Disabilities Act of 1990 (42 U.S.C. 12162(e)(2)). The evaluation shall include, for each applicable station, improvements required to bring it into compliance with the applicable parts of such section 242(e)(2), any potential barriers to achieving compliance, including issues related to passenger rail station platforms, the estimated cost of the improvements necessary, the identification of the responsible person (as defined in section 241(5) of that Act (42 U.S.C. 12161(5))), and the earliest practicable date when such improvements can be made. The evaluation shall also include a detailed plan and schedule for bringing all applicable stations into compliance with the applicable parts of section 242(e)(2) by the 2010 statutory deadline for station accessibility. Amtrak shall submit the evaluation to the Committee on Transportation and Infrastructure of the House of Representatives; the Committee on Commerce, Science, and Transportation of the Senate; the Department of Transportation; and the National Council on Disability by February 1, 2009, along with recommendations for funding the necessary improvements. Should the Department of Transportation issue any rule related to transportation for individuals with disabilities by intercity passenger rail after Amtrak submits its evaluation, Amtrak shall, within 120 days after the date that such rule is published, submit to the above parties a supplemental evaluation on any impact of the rule on its cost and schedule for achieving full compliance.

(b) ACCESSIBILITY IMPROVEMENTS AND BARRIER REMOVAL FOR PEOPLE WITH DISABILITIES.—There are authorized to be appropriated to the Secretary for the use of Amtrak such sums as may be necessary to improve the accessibility of facilities, including rail platforms, and services.

SEC. 220. OVERSIGHT OF AMTRAK’S COMPLIANCE WITH ACCESSIBILITY REQUIREMENTS.

Using the funds authorized by section 103 of this division, the Federal Railroad Administration shall monitor and conduct periodic reviews of Amtrak’s compliance with applicable sections of the Americans with Disabilities Act of 1990 and the Rehabilitation Act of 1974 to ensure that Amtrak’s services and facilities are accessible to individuals with disabilities to the extent required by law.

The Amtrak Board of Directors is encouraged to develop an incentive pay program for Amtrak management employees.

SEC. 224. PASSENGER RAIL SERVICE STUDIES.

(a) I NTERCITY RAIL SERVICE STUDIES.—Within 1 year after the date of enactment of this Act, Amtrak shall conduct studies of the following routes:

(1) The Pioneer Route between Seattle and Chicago, which was operated by Amtrak until 1997, to determine whether to reinstate passenger rail service along the route or along segments of the route.

(2) The North Coast Hiawatha Route between Chicago and Seattle, through southern Montana, which was operated by Amtrak until 1979, to determine whether to reinstate passenger rail service along the route or along segments of the route, provided that such service will not negatively impact existing Amtrak routes.

(3) Between Cornwells Heights, Pennsylvania, and New York, New York, to determine whether to expand passenger rail service by increasing the frequency of stops or reducing commuter ticket prices for this route.

(5) Between Harrisburg and Pittsburgh, Pennsylvania, to determine whether to increase frequency of passenger rail service along the route or along segments of the route.

(6) The Capitol Limited Route between Cumberland, Maryland, and Pittsburgh, Pennsylvania, to determine whether to reinstate a station stop at Rockwood, Pennsylvania.

(b) ASSISTANCE.—The Comptroller General of the General Accountability Office shall, upon request by Amtrak, assist Amtrak in conducting the studies under subsection (a).

(c) HIGH-SPEED RAIL CORRIDOR STUDIES.—(1) The Secretary shall conduct—

(A) an analysis of the Secretary's December 1, 1998, extension of the designation of the Southeast High-Speed Rail Corridor as authorized under section 104(d)(2) of title 23, United States Code, including an analysis of alternative routings for the corridor;

(B) a feasibility analysis regarding the expansion of the South Central High-Speed Rail Corridor—

(i) to Memphis, Tennessee;

(iii) through Killeen, Texas; and

(iv) south of San Antonio, Texas, to a location in far south Texas to be chosen at the discretion of the Secretary; and

(C) a feasibility analysis regarding the expansion of the Keystone Corridor to Cleveland, Ohio.

These analyses shall consider changes that have occurred in the region's population, anticipated patterns of population growth, connectivity with other modes of transportation, the ability of the proposed corridor to reduce regional traffic congestion, and the ability of current and proposed routings to enhance tourism. Within 1 year after the date of enactment of this Act, the Secretary shall submit a report on these analyses to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate, and shall redesignate or modify corridor designations based on these analyses, if necessary.

(2) The Secretary shall establish a process for a State or group of States to petition the Secretary to redesignate or modify any designated high-speed rail corridors.

SEC. 225. REPORT ON SERVICE DELAYS ON CERTAIN PASSENGER RAIL ROUTES.

Within 6 months after the date of the enactment of this Act, the Inspector General of the Department of Transportation shall submit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report that—

(1) describes service delays and the sources of such delays on—

(A) the Amtrak passenger rail route between Seattle, Washington, and Los Angeles, California (commonly known as the “Coast Starlight”); and

(B) the Amtrak passenger rail route between Vancouver, British Columbia, Canada, and Eugene, Oregon (commonly known as “Amtrak Cascades”); and
(2) contains recommendations for improving the on-time performance of such routes.

SEC. 226. PLAN FOR RESTORATION OF SERVICE.

Within 9 months after the date of enactment of this Act, Amtrak shall transmit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a plan for restoring passenger rail service between New Orleans, Louisiana, and Sanford, Florida. The plan shall include a projected timeline for restoring such service, the costs associated with restoring such service, and any proposals for legislation necessary to support such restoration of service. In developing the plan, Amtrak shall consult with representatives from the States of Louisiana, Alabama, Mississippi, and Florida, railroad carriers whose tracks may be used for such service, rail passengers, rail labor, and other entities as appropriate.

SEC. 227. MAINTENANCE AND REPAIR FACILITY UTILIZATION STUDY.

Within 9 months after the date of enactment of this Act, the Inspector General of the Department of Transportation shall transmit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate a report on Amtrak’s utilization of its equipment maintenance and repair facilities, including the Beech Grove Mechanical Facility in Indiana. The report shall include an examination of Amtrak’s utilization of its existing equipment maintenance and repair facilities, the productivity of such facilities, and the extent to which Amtrak is maximizing opportunities for utilizing each facility, including the provision of maintenance and repair to other rail carriers. In developing this report, the Inspector General shall consult with the Inspector General of Amtrak, Amtrak management, rail labor, and other railroad carriers, as it deems appropriate.

SEC. 228. SENSE OF THE CONGRESS REGARDING THE NEED TO MAINTAIN AMTRAK AS A NATIONAL PASSENGER RAIL SYSTEM.

(a) FINDINGS.—The Congress makes the following findings:

(1) In fiscal year 2007, 3,800,000 passengers traveled on Amtrak’s long-distance trains, an increase of 2.4 percent over fiscal year 2006.

(2) Amtrak long-distance routes generated $376,000,000 in revenue in fiscal year 2007, an increase of 5 percent over fiscal year 2006.

(3) Amtrak operates 15 long-distance trains over 18,500 route miles that serve 39 States and the District of Columbia. These trains provide the only rail passenger service to 23 States.

(4) Amtrak’s long-distance trains provide an essential transportation service for many communities and to a significant percentage of the general public.

(5) Many long-distance trains serve small communities with limited or no significant air or bus service, especially in remote or isolated areas in the United States.

(6) As a result of airline deregulation and decisions by national bus carriers to leave many communities, rail transportation may provide the only feasible common carrier transportation option for a growing number of areas.
(7) If long-distance trains were eliminated, 23 States and 243 communities would be left with no intercity passenger rail service and 16 other States would lose some rail service. These trains provide a strong economic benefit for the States and communities that they serve.

(8) Long-distance trains also provide transportation during periods of severe weather or emergencies that stall other modes of transportation.

(9) Amtrak provided the only reliable long-distance transportation following the September 11, 2001, terrorist attacks that grounded air travel.

(10) The majority of passengers on long-distance trains do not travel between the endpoints, but rather between any combination of cities along the route.

(11) Passenger trains provide transportation options, mobility for underserved populations, congestion mitigation, and jobs in the areas they serve.

(12) Passenger rail has a positive impact on the environment compared to other modes of transportation by conserving energy, reducing greenhouse gas emissions, and cutting down on other airborne particulate and toxic emissions.

(13) Amtrak communities that are served use passenger rail and passenger rail stations as a significant source of economic development.

(14) This division makes meaningful and important reforms to increase the efficiency, profitability and on-time performance of Amtrak’s long-distance routes.

(b) SENSE OF THE CONGRESS.—It is the sense of the Congress that—

(1) long-distance passenger rail is a vital and necessary part of our national transportation system and economy; and

(2) Amtrak should maintain a national passenger rail system, including long-distance routes, that connects the continental United States from coast to coast and from border to border.

“(g) FEDERAL SHARE OF NET PROJECT COST.—

“(1)(A) Based on engineering studies, studies of economic feasibility, and information on the expected use of equipment or facilities, the Secretary shall estimate the net project cost.

“(B) A grant for the project shall not exceed 80 percent of the project net capital cost.

“(C) The Secretary shall give priority in allocating future obligations and contingent commitments to incur obligations to grant requests seeking a lower Federal share of the project net capital cost.

“(2) Up to an additional 20 percent of the required non-Federal funds may be funded from amounts appropriated to
or made available to a department or agency of the Federal Government that are eligible to be expended for transportation.

“(3) The following amounts, not to exceed $15,000,000 per fiscal year, shall be available to each applicant as a credit toward an applicant's matching requirement for a grant awarded under this section—

“(ii) 50 percent of the average of amounts expended in fiscal years 2002 through 2008 by an applicant for operating costs of such service; and

“(B) in each of fiscal years 2010, 2011 and 2012, 50 percent of the amount by which the amounts expended for capital projects and operating costs related to intercity passenger rail service by an applicant in the prior fiscal year exceed the average capital and operating expenditures made for such service in fiscal years 2006, 2007, and 2008.

The Secretary may require such information as necessary to verify such expenditures. Credits made available to an applicant in a fiscal year under this paragraph may only be applied towards grants awarded in that fiscal year.

“(4) The Federal share of expenditures for capital improvements under this chapter may not exceed 100 percent.

“(h) 2-YEAR AVAILABILITY.—Funds appropriated under this section shall remain available until expended. If any amount provided as a grant under this section is not obligated or expended for the purposes described in subsection (a) within 2 years after the date on which the State received the grant, such sums shall be returned to the Secretary for other intercity passenger rail development projects under this section at the discretion of the Secretary.

“(1) in which there is no intercity passenger rail service for the purpose of funding freight rail capital projects that are on a State rail plan developed under chapter 227 of this title that provide public benefits (as defined in chapter 227) as determined by the Secretary; or

“(2) in which the rail transportation system is not physically connected to rail systems in the continental United States or may not otherwise qualify for a grant under this section due to the unique characteristics of the geography of that State or other relevant considerations, for the purpose of funding transportation-related capital projects.

“(k) SMALL CAPITAL PROJECTS.—The Secretary shall make not less than 5 percent annually available from the amounts authorized under section 101(c) of the Passenger Rail Investment and Improvement Act of 2008 beginning in fiscal year 2009 for grants for capital projects eligible under this section not exceeding $2,000,000, including costs eligible under section 209(d) of that Act. For grants awarded under this subsection, the Secretary may waive requirements of this section, including state rail plan requirements, as appropriate.

“(l) NONMOTORIZED TRANSPORTATION ACCESS AND STORAGE.—Grants under this chapter may be used to provide access to rolling stock for nonmotorized transportation, including bicycles, and recreational equipment, and to provide storage capacity in trains for such transportation, equipment, and other luggage, to ensure passenger safety.

“§ 24403. Project management oversight

(b) CLERICAL AMENDMENT.—The table of chapters of such subtitle is amended by adding after the item relating to chapter 283 the following:

“285. COMMUTER RAIL MEDIATION ...............................................................28501”.

SEC. 402. ROUTING EFFICIENCY DISCUSSIONS WITH AMTRAK.

Amtrak, commuter rail entities, regional and State public transportation authorities, and freight railroad carriers are encouraged to engage in good faith discussions with respect to the routing and timing of trains to efficiently move a maximum number of commuter, intercity, and regional rail passengers, particularly during the peak times of commuter usage.

SEC. 403. SENSE OF CONGRESS REGARDING COMMUTER RAIL EXPANSION.

(a) FINDINGS.—The Congress find the following:

(1) In 2006, Americans took 10.1 billion trips on public transportation for the first time since 1949.

(2) The Northeast region is one of the Nation’s largest emerging transportation “megaregions” where infrastructure expansion and improvements are most needed.

(3) New England’s road traffic has increased two to three times faster than its population since 1990.

(4) Connecticut has one of the Nation’s longest average commute times according to the United States Census Bureau, and 80 percent of Connecticut commuters drive by themselves to work, demonstrating the need for expanded commuter rail access.

(5) The Connecticut Department of Transportation has pledged to modernize, repair, and strengthen the rail line infrastructure to provide for increased safety and security along a crucial transportation corridor in the Northeast.

(6) Expanded New Haven-Springfield rail service would improve access to Bradley International Airport, one the region’s busiest airports, as well as to Hartford, Connecticut,
and Springfield, Massachusetts, two of the region’s commercial, residential, and industrial centers.

(7) Expanded commuter rail service on the New Haven-Springfield line could result in an estimated 630,000 additional trips per year and 2,215,384 passenger miles per year, helping to curb pollution and greenhouse gas emissions from road vehicle traffic.

(8) The MetroNorth New Haven Line and Shore Line East railways saw respective 3.43 percent and 4.93 percent increases in ridership over the course of 2007, demonstrating the need for expanded commuter rail service in Connecticut.

(9) Expanded New Haven-Springfield commuter rail service could provide transportation nearly 17 times more efficient in terms of average mileage versus road vehicles, alleviating road congestion and providing a significant savings to consumers during a time of high gas prices.

(b) SENSE OF CONGRESS.—It is the sense of the Congress that expanded commuter rail service on the rail line between New Haven, Connecticut, and Springfield, Massachusetts, is an important transportation priority, and Amtrak should work cooperatively with the States of Connecticut and Massachusetts to enable expanded commuter rail service on such line.

(c) INFRASTRUCTURE MAINTENANCE REPORT.—Amtrak shall submit a report to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate, and to the State Departments of Transportation of Connecticut and Massachusetts, on the total cost of uncompleted infrastructure maintenance on the rail line between New Haven, Connecticut, and Springfield, Massachusetts.

SEC. 404. LOCOMOTIVE BIOFUEL STUDY.

(a) IN GENERAL.—The Secretary, in consultation with the Secretary of Energy and the Administrator of the Environmental Protection Agency, shall conduct a study to determine the extent to which freight railroads, Amtrak, and other passenger rail operators could use biofuel blends to power locomotives and other vehicles that can operate on diesel fuel, as appropriate.

(b) DEFINITION.—In this section, the term “biofuel” has the meaning given such term by section 9001 of the Farm Security and Rural Investment Act of 2002 (7 U.S.C. 8101).

(c) FACTORS.—In conducting the study, the Secretary shall consider—

(1) the energy intensity of various biofuel blends compared to diesel fuel;

(2) environmental and energy effects of using various biofuel blends compared to diesel fuel, including emission effects;

(3) the cost of purchasing biofuel blends;

(4) whether sufficient biofuel is readily available;

(5) any public benefits derived from the use of such fuels; and

(6) the effect of biofuel use on locomotive and other vehicle performance and warranty specifications.

(d) LOCOMOTIVE TESTING.—As part of the study, the Secretary shall test locomotive engine performance and emissions using blends
of biofuel and diesel fuel in order to recommend premium locomotive biofuel blends.

(e) Report.—Within 1 year after the date of enactment of this Act, the Secretary shall issue the results of this study to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Commerce, Science, and Transportation of the Senate.

SEC. 405. STUDY OF THE USE OF BIOBASED TECHNOLOGIES.

The Secretary shall work with an agricultural-based lubricant testing facility or facilities to complete this study. The study shall include—

1. an analysis of the potential use of soy-based grease and soy-based hydraulic fluids to perform according to railroad industry standards;
2. an analysis of the potential use of other readily biodegradable lubricants to perform according to railroad industry standards;
3. a comparison of the health and safety of petroleum-based lubricants with biobased lubricants, which shall include an analysis of fire safety; and

1. develop a strategic plan to facilitate expanded passenger rail service across the international border between the United States and Canada during the 2010 Olympic Games on the Amtrak passenger rail route between Vancouver, British Columbia, Canada, and Eugene, Oregon (commonly known as “Amtrak Cascades”);
2. develop recommendations for the Department of Homeland Security to process efficiently rail passengers traveling on Amtrak Cascades across such international border during the 2010 Olympic Games; and
3. submit to Congress a report containing the strategic plan described in paragraph (1) and the recommendations described in paragraph (2).

(b) Travel Facilitation.—Using existing authority or agreements, or upon reaching additional agreements with Canada, the Secretary and other Federal agencies, as appropriate, are authorized to establish facilities and procedures to conduct preclearance of passengers traveling on Amtrak trains from Canada to the United States. The Secretary shall seek to establish such facilities and procedures—
(1) in Vancouver, Canada, no later than June 1, 2009; and
(2) in other areas as determined appropriate by the Secretary.

Public Law 110–451
110th Congress

An Act
To require the Secretary of the Treasury to mint coins in commemoration of the semicentennial of the enactment of the Civil Rights Act of 1964.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.
This Act may be cited as the “Civil Rights Act of 1964 Commemorative Coin Act”.

SEC. 2. FINDINGS.
The Congress hereby finds as follows:
(1) On December 1, 1955, Rosa Parks’ brave act of defiance, refusing to give up her seat to a white person on a segregated bus in Montgomery, Alabama, galvanized the modern civil rights movement and led to the desegregation of the South.
(2) On February 1, 1960, 4 college students, Joseph McNeil, Franklin McCain, David Richmond, and Ezell Blair, Jr., asked to be served at a lunch counter in Greensboro, North Carolina, and lunch counter sit-ins began to occur throughout the South to challenge segregation in places of public accommodation.
(3) On May 4, 1961, the Freedom Rides into the South began to test new court orders barring segregation in interstate transportation, and riders were jailed and beaten by mobs in several places, including Birmingham and Montgomery, Alabama.
(4) Dr. Martin Luther King, Jr., was the leading civil rights advocate of the time, spearheading the civil rights movement in the United States during the 1950s and 1960s with the goal of nonviolent social change and full civil rights for African Americans.
(5) On August 28, 1963, Dr. Martin Luther King, Jr., led over 250,000 civil rights supporters in the March on Washington and delivered his famous “I Have A Dream” speech to raise awareness and support for civil rights legislation.
(6) Mrs. Coretta Scott King, a leading participant in the American civil rights movement, was side-by-side with her husband, Dr. Martin Luther King, Jr., during many civil rights marches, organized Freedom Concerts to draw attention to the Movement, and worked in her own right to create an America in which all people have equal rights.
(7) The mass movement sparked by Rosa Parks and led by Dr. Martin Luther King, Jr., among others, called upon the Congress and Presidents John F. Kennedy and Lyndon
B. Johnson to pass civil rights legislation which culminated in the enactment of the Civil Rights Act of 1964.

(8) The Civil Rights Act of 1964 greatly expanded civil rights protections, outlawing racial discrimination and segregation in public places and places of public accommodation, in federally funded programs, and employment and encouraging desegregation in public schools, and has served as a model for subsequent anti-discrimination laws.

(9) We are an eminently better Nation because of Rosa Parks, Dr. Martin Luther King, Jr., and all those men and women who have confronted, and continue to confront, injustice and inequality wherever they see it.

(10) Equality in education was one of the cornerstones of the civil rights movement.

(11) On September 10, 1961, Dr. Martin Luther King, Jr., wrote that African American “students are coming to understand that education and learning have become tools for shaping the future and not devices of privilege for an exclusive few.”

(12) Over its long and distinguished history, the United Negro College Fund has provided scholarships and operating funds to its member colleges that have enabled more than 300,000 young African Americans to earn college degrees and become successful members of society.

(13) Those graduates include Dr. Martin Luther King, Jr., as well as leaders in the fields of education, science, medicine, law, entertainment, literature, the military, and politics who have made major contributions to the civil rights movement and the creation of a more equitable society.

(14) Congress has an obligation to lead America's continued struggle to fight discrimination and ensure equal rights for all.

(15) The year 2014 will mark the semicentennial of the passage of the Civil Rights Act of 1964.

SEC. 3. COIN SPECIFICATIONS.

(a) Denominations.—The Secretary of the Treasury (hereinafter in this Act referred to as the “Secretary”) shall mint and issue not more than 350,000 $1 coins each of which shall—

(1) weigh 26.73 grams;

(3) contain 90 percent silver and 10 percent copper.

(b) Legal Tender.—The coins minted under this Act shall be legal tender, as provided in section 5103 of title 31, United States Code.

An Act

To provide for a program for circulating quarter dollar coins that are emblematic of a national park or other national site in each State, the District of Columbia, and each territory of the United States, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “America’s Beautiful National Parks Quarter Dollar Coin Act of 2008”.

TITLE I—NATIONAL SITE QUARTER DOLLARS

SEC. 101. FINDINGS.

The Congress finds as follows:

(1) Yellowstone National Park was established by an Act signed by President Ulysses S. Grant on March 1, 1872, as the Nation’s first national park.

(2) The summer and autumn of 1890 saw the establishment of a number of national sites:

(A) August 19: Chickamauga and Chattanooga established as national military parks in Georgia and Tennessee.

(B) August 30: Antietam established as a national battlefield site in Maryland.

(C) September 25: Sequoia National Park established in California.

(D) September 27: Rock Creek Park established in the District of Columbia.

(E) October 1: General Grant National Park established in California (and subsequently incorporated in Kings Canyon National Park).

(F) October 1: Yosemite National Park established in California.

(3) Theodore Roosevelt was this nation’s 26th President and is considered by many to be our “Conservationist President”.

(4) As a frequent visitor to the West, Theodore Roosevelt witnessed the virtual destruction of some big game species and the overgrazing that destroyed the grasslands and with them the habitats for small mammals and songbirds and conservation increasingly became one of his major concerns.
(5) When he became President in 1901, Roosevelt pursued this interest in conservation by establishing the first 51 Bird Reserves, 4 Game Preserves, and 150 National Forests.

(6) He also established the United States Forest Service, signed into law the creation of 5 National Parks, and signed the Act for the Preservation of American Antiquities in 1906 under which he proclaimed 18 national monuments.

(7) Approximately 230,000,000 acres of area within the United States was placed under public protection by Theodore Roosevelt.

(8) Theodore Roosevelt said that nothing short of defending this country in wartime “compares in importance with the great central task of leaving this land even a better land for our descendants than it is for us”.

(9) The National Park Service was created by an Act signed by President Woodrow Wilson on August 25, 1916.

(10) The National Park System comprises 391 areas covering more than 84,000,000 acres in every State (except Delaware), the District of Columbia, American Samoa, Guam, Puerto Rico, and the Virgin Islands.

(11) The sites or areas within the National Park System vary widely in size and type from vast natural wilderness to birthplaces of Presidents to world heritage archaeology sites to an African burial ground memorial in Manhattan and include national parks, monuments, battlefields, military parks, historical parks, historic sites, lakeshores, seashores, recreation areas, scenic rivers and trails, and the White House.

(12) In addition to the sites within the National Park System, the United States has placed numerous other types of sites under various forms of conservancy, such as the national forests and sites within the National Wildlife Refuge System and on the National Register of Historic Places.

SEC. 102. ISSUANCE OF REDESIGNED QUARTER DOLLARS EMBLEMATIC OF NATIONAL PARKS OR OTHER NATIONAL SITES IN EACH STATE, THE DISTRICT OF COLUMBIA, AND EACH TERRITORY.

Section 5112 of title 31, United States Code, is amended by adding at the end the following new subsection:

“(t) REDESIGN AND ISSUANCE OF QUARTER DOLLARS EMBLEMATIC OF NATIONAL SITES IN EACH STATE, THE DISTRICT OF COLUMBIA, AND EACH TERRITORY.—

“(1) Redesign beginning upon completion of prior program.—

“(A) In general.—Notwithstanding the fourth sentence of subsection (d)(1) and subsection (d)(2), quarter dollars issued beginning in 2010 shall have designs on the reverse selected in accordance with this subsection which are emblematic of the national sites in the States, the District of Columbia and the territories of the United States.
