Public Law 110–346
110th Congress

An Act

To amend the North Korean Human Rights Act of 2004 to promote respect for the fundamental human rights of the people of North Korea, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.
This Act may be cited as the “North Korean Human Rights Reauthorization Act of 2008”.

SEC. 2. FINDINGS.
Congress finds the following:

(1) The North Korean Human Rights Act of 2004 (Public Law 108–333; 22 U.S.C. 7801 et seq.) (in this section referred to as “the Act”) was the product of broad, bipartisan consensus in Congress regarding the promotion of human rights, transparency in the delivery of humanitarian assistance, and refugee protection.

(2) In addition to the longstanding commitment of the United States to refugee and human rights advocacy, the United States is home to the largest Korean population outside of northeast Asia, and many in the two-million strong Korean-American community have family ties to North Korea.

(3) Human rights and humanitarian conditions inside North Korea are deplorable, North Korean refugees remain acutely vulnerable, and the findings in section 3 of the Act remain accurate today.

(4) The Government of China is conducting an increasingly aggressive campaign to locate and forcibly return border-crossers to North Korea, where they routinely face torture and imprisonment, and sometimes execution. According to recent reports, the Chinese Government is shutting down Christian churches and imprisoning people who help North Korean defectors and has increased the bounty paid for turning in North Korean refugees.

(5) In an attempt to deter escape attempts, the Government of North Korea has reportedly stepped up its public execution of border-crossers and those who help others cross into China.

(6) In spite of the requirement of the Act that the Special Envoy on Human Rights in North Korea (the “Special Envoy”) report to the Congress no later than April 16, 2005, a Special Envoy was not appointed until August 19, 2005, more than four months after the reporting deadline.

(7) The Special Envoy appointed by the President has filled that position on a part-time basis only.
(8) Since the passage of the North Korean Human Rights Act, Congress has on several occasions expressed interest in the status of North Korean refugees, and on February 21, 2006, a bipartisan group of senior Members of the House and Senate wrote Secretary of State Condoleezza Rice “to express [their] deep concern for the lack of progress in funding and implementing the key provisions of the North Korean Human Rights Act”, particularly the lack of North Korean refugee admissions to the United States.

(9) Although the United States refugee resettlement program remains the largest in the world by far, the United States has resettled only 37 North Koreans in the period from 2004 through 2007.

(10) From the end of 2004 through 2007, the Republic of Korea resettled 5,961 North Koreans.

(11) Extensive delays in assessment and processing have led numerous North Korean refugees to abandon their quest for United States resettlement, and long waits (of more than a year in some cases) have been the source of considerable discouragement and frustration among refugees, many of whom are awaiting United States resettlement in circumstances that are unsafe and insecure.

(12) From 2000 through 2006, the United States granted asylum to 15 North Koreans, as compared to 60 North Korean asylum grantees in the United Kingdom, and 135 in Germany during that same period.

SEC. 3. SENSE OF CONGRESS.

It is the sense of Congress that—

(1) the United States should continue to make it a priority to seek broader permission and greater cooperation from foreign governments to allow the United States to process North Korean refugees overseas for resettlement in the United States, through persistent diplomacy by senior officials of the United States, including United States ambassadors to Asia-Pacific nations;

(2) at the same time that careful screening of intending refugees is important, the United States also should make every effort to ensure that its screening, processing, and resettlement of North Korean refugees are as efficient and expeditious as possible;

(3) the Special Envoy for North Korean Human Rights Issues should be a full-time position within the Department of State in order to properly promote and coordinate North Korean human rights and humanitarian issues, and to participate in policy planning and implementation with respect to refugee issues, as intended by the North Korean Human Rights Act of 2004 (Public Law 108–333; 22 U.S.C. 7801 et seq.);

(4) in an effort to more efficiently and actively participate in humanitarian burden-sharing, the United States should approach our ally, the Republic of Korea, to revisit and explore new opportunities for coordinating efforts to screen and resettle North Koreans who have expressed a wish to pursue resettlement in the United States and have not yet availed themselves of any right to citizenship they may enjoy under the Constitution of the Republic of Korea; and
(5) because there are genuine refugees among North Koreans fleeing into China who face severe punishments upon their forcible return, the United States should urge the Government of China to—

(A) immediately halt its forcible repatriation of North Koreans;

(B) fulfill its obligations pursuant to the 1951 United Nations Convention Relating to the Status of Refugees, the 1967 Protocol Relating to the Status of Refugees, and the 1995 Agreement on the Upgrading of the UNHCR Mission in the People’s Republic of China to UNHCR Branch Office in the People’s Republic of China; and

(C) allow the United Nations High Commissioner for Refugees (UNHCR) unimpeded access to North Koreans inside China to determine whether they are refugees and whether they require assistance.

SEC. 4. DEFINITIONS.

SEC. 3. FINDINGS.
Congress finds the following:
(1) For almost a decade the Subcommittee on Economic Development, Public Buildings, and Emergency Management of the Committee on Transportation and Infrastructure of the House of Representatives has expressed considerable concern about the waste and neglect of the valuable, historic Old Post Office Building, centrally located in the heart of the Nation’s Capital on Pennsylvania Avenue, and has pressed the General Services Administration to develop and fully use this building.
(2) The policy of the Government long has been to preserve and make usable historic properties rather than sell them for revenue.
(3) Security concerns related to this property’s proximity to the White House may hinder the sale of the Old Post Office Building to a private party.
(4) On December 28, 2000, the General Services Administration, pursuant to Public Law 105–277, submitted to the Committee on Transportation and Infrastructure of the House of Representatives and the Committees on Appropriations and Environment and Public Works of the Senate a plan for the comprehensive redevelopment of the Old Post Office.
(6) The General Services Administration issued a Request for Expression of Interest in 2004 for developing the Old Post
Office Building that generated a healthy, private sector interest, but the General Services Administration has failed to proceed with implementation of the approved redevelopment plan.

(7) Redevelopment of the Old Post Office Building will preserve the historic integrity of this unique and important asset, put it to its highest and best use, and provide a lucrative financial return to the Government.

SEC. 4. REDEVELOPMENT OF OLD POST OFFICE BUILDING.

(a) In General.—The Administrator of General Services is directed to proceed with redevelopment of the Old Post Office Building, in accordance with existing authorities available to the Administrator and consistent with the redevelopment plan previously approved by the Committee on Transportation and Infrastructure of the House of Representatives and the Committees on Appropriations and Environment and Public Works of the Senate.

SEC. 5. REPORTING REQUIREMENT.

(a) In General.—The Administrator of General Services shall transmit to the Committee on Transportation and Infrastructure of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on any proposed redevelopment agreement related to the Old Post Office Building.

(b) Contents.—A report transmitted under this section shall include a summary of a cost-benefit analysis of the proposed development agreement and a description of the material provisions of the proposed agreement.

(c) Review by Congress.—Any proposed development agreement related to the Old Post Office Building may not become effective until the end of a 30-day period of continuous session of Congress following the date of the transmittal of the report required under this section. For purposes of the preceding sentence, continuity of a session of Congress is broken only by an adjournment sine die, and there shall be excluded from the computation of such 30-day period any day during which either House of Congress...
is not in session during an adjournment of more than 3 days to a day certain.

Public Law 110–376
110th Congress
An Act
To reauthorize the United States Fire Administration, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.
This subtitle may be cited as the “United States Fire Administration Reauthorization Act of 2008”.

SEC. 2. FINDINGS.
Congress makes the following findings:
(1) The number of lives lost each year because of fire has dropped significantly over the last 25 years in the United States. However, the United States still has one of the highest fire death rates in the industrialized world. In 2006, the National Fire Protection Association reported 3,245 civilian fire deaths, 16,400 civilian fire injuries, and $11,307,000,000 in direct losses due to fire.
(2) Every year, more than 100 firefighters die in the line of duty. The United States Fire Administration should continue its leadership to help local fire agencies dramatically reduce these fatalities.
(3) The Federal Government should continue to work with State and local governments and the fire service community to further the promotion of national voluntary consensus standards that increase firefighter safety.
(4) The United States Fire Administration provides crucial support to the 30,300 fire departments of the United States through training, emergency incident data collection, fire awareness and education, and support of research and development activities for fire prevention, control, and suppression technologies.
(5) The collection of data on fire and other emergency incidents is a vital tool both for policy makers and emergency responders to identify and develop responses to emerging hazards. Improving the data collection capabilities of the United States Fire Administration is essential for accurately tracking and responding to the magnitude and nature of the fire problems of the United States.
(6) The research and development performed by the National Institute of Standards and Technology, the United States Fire Administration, other government agencies, and nongovernmental organizations on fire technologies, techniques, and tools advance the capabilities of the fire service of the United States to suppress and prevent fires.
(7) Because of the essential role of the United States Fire Administration and the fire service community in preparing for and responding to national and man-made disasters, the United States Fire Administration should have a prominent place within the Federal Emergency Management Agency and the Department of Homeland Security.

Public Law 110–377
110th Congress

An Act

To amend the Public Health Service Act to reauthorize the poison center national toll-free number, national media campaign, and grant program to provide assistance for poison prevention, sustain the funding of poison centers, and enhance the public health of people of the United States.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Poison Center Support, Enhancement, and Awareness Act of 2008”.

SEC. 2. FINDINGS.

Congress makes the following findings:

(1) Poison control centers are the primary defense of the United States against injury and deaths from poisoning. Twenty-four hours a day, the general public as well as health care practitioners contact their local poison control centers for help in diagnosing and treating victims of poisoning. In 2007, more than 4,000,000 calls were managed by poison control centers providing ready and direct access for all people of the United States, including many underserved populations in the United States, with vital emergency public health information and response.

(2) Poisoning is the second most common form of unintentional death in the United States. In any given year, there will be between 3,000,000 and 5,000,000 poison exposures. Sixty percent of these exposures will involve children under the age of 6 who are exposed to toxins in their home. Poisoning accounts for 285,000 hospitalizations, 1,200,000 days of acute hospital care, and more than 26,000 fatalities in 2005.

(3) In 2008, the Harvard Injury Control Research Center reported that poisonings from accidents and unknown circumstances more than tripled in rate since 1990. In 2005, the last year for which data are available, 26,858 people died from accidental or unknown poisonings. This represents an increase of 20,000 since 1990 and an increase of 2,400 between 2004 and 2005. Fatalities from poisoning are increasing in the United States in near epidemic proportions. The funding of programs to reverse this trend is needed now more than ever.

(4) In 2004, The Institute of Medicine of the National Academy of Sciences recommended that “Congress should amend the current Poison Control Center Enhancement and Awareness Act Amendments of 2003 to provide sufficient...
funding to support the proposed Poison Prevention and Control System with its national network of poison centers. Support for the core activities at the current level of service is estimated to require more than $100 million annually.”.

(5) Sustaining the funding structure and increasing accessibility to poison control centers will promote the utilization of poison control centers and reduce the inappropriate use of emergency medical services and other more costly health care services. The 2004 Institute of Medicine Report to Congress determined that for every $1 invested in the Nation’s poison control centers $7 of health care costs are saved. In 2005, direct Federal health care program savings totaled in excess of $525,000,000 as the result of poison control center public health services.

(6) More than 30 percent of the cost savings and financial benefits of the Nation’s network of poison control centers are realized annually by Federal health care programs (estimated to be more than $1,000,000,000), yet Federal funding support (as demonstrated by the annual authorization of $30,100,000 in Public Law 108–194) comprises less than 11 percent of the annual network expenditures of poison centers.

(7) Real-time data collected from the Nation’s certified poison control centers can be an important source of information for the detection, monitoring, and response for contamination of the air, water, pharmaceutical, or food supply.

(8) In the event of a terrorist event, poison control centers will be relied upon as a critical source for accurate medical information and public health emergency response concerning the treatment of patients who have had an exposure to a chemical, radiological, or biological agent.

SEC. 3. REAUTHORIZATION OF POISON CONTROL CENTERS NATIONAL TOLL-FREE NUMBER.

Section 1271 of the Public Health Service Act (42 U.S.C. 300d–71) is amended to read as follows:

“SEC. 1271. MAINTENANCE OF THE NATIONAL TOLL-FREE NUMBER.

“(a) IN GENERAL.—The Secretary shall provide coordination and assistance to poison control centers for the establishment of a nationwide toll-free phone number, and the maintenance of such number, to be used to access such centers.

“(b) AUTHORIZATION OF APPROPRIATIONS.—There is authorized to be appropriated $2,000,000 for fiscal year 2009 to carry out this section, and $700,000 for each of fiscal years 2010 through 2014 for the maintenance of the nationwide toll free phone number under subsection (a).”.

SEC. 4. REAUTHORIZATION OF NATIONWIDE MEDIA CAMPAIGN TO PROMOTE POISON CONTROL CENTER UTILIZATION.

Congress makes the following findings:

(1) More than 1,500,000 members of the Armed Forces have been deployed in Operation Iraqi Freedom and Operation Enduring Freedom. The 2005 Department of Defense Survey of Health Related Behaviors Among Active Duty Personnel reports that 23 percent of members of the Armed Forces on active duty acknowledge a significant problem with alcohol use disorder, with similar rates of acknowledged problems with alcohol use disorder among members of the National Guard.

(2) The effects of substance use disorder are wide ranging, including significantly increased risk of suicide, exacerbation of mental and physical health disorders, breakdown of family support, and increased risk of unemployment and homelessness.

(3) While veterans suffering from mental health conditions, chronic physical illness, and polytrauma may be at increased risk for development of a substance use disorder, treatment for these veterans is complicated by the need to address adequately the physical and mental symptoms associated with these conditions through appropriate medical intervention.

(4) While the Veterans Health Administration has dramatically increased health services for veterans from 1996 through 2006, the number of veterans receiving specialized substance use disorder treatment services decreased 18 percent during that time. No comparable decrease in the national rate of substance use disorder has been observed during that time.

(5) While some facilities of the Veterans Health Administration provide exemplary substance use disorder treatment services, the availability of such treatment services throughout the health care system of the Veterans Health Administration is inconsistent.

(6) According to a 2006 report by the Government Accountability Office, the Department of Veterans Affairs significantly reduced its substance use disorder treatment and rehabilitation services between 1996 and 2006, and the Fiscal Year 2007 National Mental Health Program Monitoring System report shows that little progress has been made in restoring these services to their pre-1996 levels.

SEC. 103. EXPANSION OF SUBSTANCE USE DISORDER TREATMENT SERVICES PROVIDED BY DEPARTMENT OF VETERANS AFFAIRS.

(a) In General.—The Secretary of Veterans Affairs shall ensure the provision of such services and treatment to each veteran enrolled in the health care system of the Department of Veterans Affairs.
Affairs who is in need of services and treatments for a substance use disorder as follows:

5. Relapse prevention services.
6. Ongoing aftercare and outpatient counseling services.
7. Opiate substitution therapy services.
8. Pharmacological treatments aimed at reducing craving for drugs and alcohol.
9. Detoxification and stabilization services.
10. Coordination with groups providing peer to peer counseling.
11. Such other services as the Secretary considers appropriate.

(b) Provision of Services.—

1. Allocation of Resources for Provision of Services.—The Secretary shall ensure that amounts made available for care, treatment, and services provided under this section are allocated in such a manner that a full continuum of care, treatment, and services described in subsection (a) is available to veterans seeking such care, treatment, or services, without regard to the location of the residence of any such veterans.

2. Manner of Provision.—The services and treatment described in subsection (a) may be provided to a veteran described in such subsection—

(A) at Department of Veterans Affairs medical centers or clinics;
(B) by referral to other facilities of the Department that are accessible to such veteran; or

SEC. 104. Care for Veterans with Mental Health and Substance Use Disorders.

(a) In General.—If the Secretary of Veterans Affairs provides a veteran inpatient or outpatient care for a substance use disorder and a comorbid mental health disorder, the Secretary shall ensure that treatment for such disorders is provided concurrently—

1. through a service provided by a clinician or health professional who has training and expertise in treatment of substance use disorders and mental health disorders;
2. by separate substance use disorder and mental health disorder treatment services when there is appropriate coordination, collaboration, and care management between such treatment services; or
3. by a team of clinicians with appropriate expertise.
(b) **Team of Clinicians With Appropriate Expertise Defined.**—In this section, the term “team of clinicians with appropriate expertise” means a team consisting of the following:

**SEC. 105. PILOT PROGRAM FOR INTERNET-BASED SUBSTANCE USE DISORDER TREATMENT FOR VETERANS OF OPERATION IRAQI FREEDOM AND OPERATION ENDURING FREEDOM.**

(a) **Findings.**—Congress makes the following findings:

1. Stigma associated with seeking treatment for mental health disorders has been demonstrated to prevent some veterans from seeking such treatment at a medical facility operated by the Department of Defense or the Department of Veterans Affairs.
2. There is a significant incidence among veterans of post-deployment mental health problems, especially among members of a reserve component who return as veterans to civilian life.
3. Computer-based self-guided training has been demonstrated to be an effective strategy for supplementing the care of psychological conditions.
4. Younger veterans, especially those who served in Operation Enduring Freedom or Operation Iraqi Freedom, are comfortable with and proficient at computer-based technology.
5. Veterans living in rural areas may find access to treatment for substance use disorder limited.
6. Self-assessment and treatment options for substance use disorders through an Internet website may reduce stigma and provides additional access for individuals seeking care and treatment for such disorders.

(b) **In General.**—Not later than October 1, 2009, the Secretary of Veterans Affairs shall carry out a pilot program to assess the feasibility and advisability of providing veterans who seek treatment for substance use disorders access to a computer-based self-assessment, education, and specified treatment program through a secure Internet website operated by the Secretary. Participation in the pilot program shall be available on a voluntary basis for those veterans who have served in Operation Enduring Freedom or Operation Iraqi Freedom.

(c) **Elements of Pilot Program.**—

1. **In General.**—In carrying out the pilot program under this section, the Secretary shall ensure that—
   (A) access to the Internet website and the programs available on the website by a veteran (or family member) does not involuntarily generate an identifiable medical record of that access by that veteran in any medical database maintained by the Department of Veterans Affairs;
   (B) the Internet website is accessible from remote locations, especially rural areas; and
   (C) the Internet website includes a self-assessment tool for substance use disorders, self-guided treatment and
educational materials for such disorders, and appropriate information and materials for family members of veterans.

(2) CONSIDERATION OF SIMILAR PROJECTS.—In designing the pilot program under this section, the Secretary shall consider similar pilot projects of the Department of Defense for the early diagnosis and treatment of post-traumatic stress disorder and other mental health conditions established under section 741 of the John Warner National Defense Authorization Act of Fiscal Year 2007 (Public Law 109–364; 120 Stat. 2304).

Public Law 110–414  
110th Congress  

An Act

To prohibit the sale, distribution, transfer, and export of elemental mercury, and
for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This Act may be cited as the “Mercury Export Ban Act of 2008”.

SEC. 2. FINDINGS.

Congress finds that—

(1) mercury is highly toxic to humans, ecosystems, and wildlife;

(2) as many as 10 percent of women in the United States of childbearing age have mercury in the blood at a level that could put a baby at risk;

(3) as many as 630,000 children born annually in the United States are at risk of neurological problems related to mercury;

(4) the most significant source of mercury exposure to people in the United States is ingestion of mercury-contaminated fish;

(5) the Environmental Protection Agency reports that, as of 2004—

(A) 44 States have fish advisories covering over 13,000,000 lake acres and over 750,000 river miles;

(B) in 21 States the freshwater advisories are statewide; and

(C) in 12 States the coastal advisories are statewide;

(6) the long-term solution to mercury pollution is to minimize global mercury use and releases to eventually achieve reduced contamination levels in the environment, rather than reducing fish consumption since uncontaminated fish represents a critical and healthy source of nutrition worldwide;

(7) mercury pollution is a transboundary pollutant, depositing locally, regionally, and globally, and affecting water bodies near industrial sources (including the Great Lakes) and remote areas (including the Arctic Circle);

(8) the free trade of elemental mercury on the world market, at relatively low prices and in ready supply, encourages the continued use of elemental mercury outside of the United States, often involving highly dispersive activities such as artisinal gold mining;
(9) the intentional use of mercury is declining in the United States as a consequence of process changes to manufactured products (including batteries, paints, switches, and measuring devices), but those uses remain substantial in the developing world where releases from the products are extremely likely due to the limited pollution control and waste management infrastructures in those countries;

(10) the member countries of the European Union collectively are the largest source of elemental mercury exports globally;

(11) the European Commission has proposed to the European Parliament and to the Council of the European Union a regulation to ban exports of elemental mercury from the European Union by 2011;

(12) the United States is a net exporter of elemental mercury and, according to the United States Geological Survey, exported 506 metric tons of elemental mercury more than the United States imported during the period of 2000 through 2004; and

(13) banning exports of elemental mercury from the United States will have a notable effect on the market availability of elemental mercury and switching to affordable mercury alternatives in the developing world.

SEC. 3. PROHIBITION ON SALE, DISTRIBUTION, OR TRANSFER OF ELEMENTAL MERCURY.

Section 6 of the Toxic Substances Control Act (15 U.S.C. 2605) is amended by adding at the end the following:

“(f) MERCURY.—

“(1) PROHIBITION ON SALE, DISTRIBUTION, OR TRANSFER OF ELEMENTAL MERCURY BY FEDERAL AGENCIES.—Except as provided in paragraph (2), effective beginning on the date of enactment of this subsection, no Federal agency shall convey, sell, or distribute to any other Federal agency, any State or local government agency, or any private individual or entity any elemental mercury under the control or jurisdiction of the Federal agency.

“(2) EXCEPTIONS.—Paragraph (1) shall not apply to—

“(A) a transfer between Federal agencies of elemental mercury for the sole purpose of facilitating storage of mercury to carry out this Act; or

“(B) a conveyance, sale, distribution, or transfer of coal.

“(3) LEASES OF FEDERAL COAL.—Nothing in this subsection prohibits the leasing of coal.”.

SEC. 4. PROHIBITION ON EXPORT OF ELEMENTAL MERCURY.

Section 12 of the Toxic Substances Control Act (15 U.S.C. 2611) is amended—

(1) in subsection (a) by striking “subsection (b)” and inserting “subsections (b) and (c)”; and

(2) by adding at the end the following:

“(c) PROHIBITION ON EXPORT OF ELEMENTAL MERCURY.—

“(1) PROHIBITION.—Effective January 1, 2013, the export of elemental mercury from the United States is prohibited.

“(2) INAPPLICABILITY OF SUBSECTION (a).—Subsection (a) shall not apply to this subsection.

“(3) REPORT TO CONGRESS ON MERCURY COMPOUNDS.—
“(A) REPORT.—Not later than one year after the date of enactment of the Mercury Export Ban Act of 2008, the Administrator shall publish and submit to Congress a report on mercuric chloride, mercurous chloride or calomel, mercuric oxide, and other mercury compounds, if any, that may currently be used in significant quantities in products or processes. Such report shall include an analysis of—

“(i) the sources and amounts of each of the mercury compounds imported into the United States or manufactured in the United States annually;

“(ii) the purposes for which each of these compounds are used domestically, the amount of these compounds currently consumed annually for each purpose, and the estimated amounts to be consumed for each purpose in 2010 and beyond;

“(iii) the sources and amounts of each mercury compound exported from the United States annually in each of the last three years;

“(iv) the potential for these compounds to be processed into elemental mercury after export from the United States; and

“(v) other relevant information that Congress should consider in determining whether to extend the export prohibition to include one or more of these mercury compounds.

“(B) PROCEDURE.—For the purpose of preparing the report under this paragraph, the Administrator may utilize the information gathering authorities of this title, including sections 10 and 11.

“(4) ESSENTIAL USE EXEMPTION.——(A) Any person residing in the United States may petition the Administrator for an exemption from the prohibition in paragraph (1), and the Administrator may grant by rule, after notice and opportunity for comment, an exemption for a specified use at an identified foreign facility if the Administrator finds that—

“(i) nonmercury alternatives for the specified use are not available in the country where the facility is located;

“(ii) there is no other source of elemental mercury available from domestic supplies (not including new mercury mines) in the country where the elemental mercury will be used;

“(iii) the country where the elemental mercury will be used certifies its support for the exemption;

“(iv) the export will be conducted in such a manner as to ensure the elemental mercury will be used at the identified facility as described in the petition, and not otherwise diverted for other uses for any reason;

“(v) the elemental mercury will be used in a manner that will protect human health and the environment, taking into account local, regional, and global human health and environmental impacts;

“(vi) the elemental mercury will be handled and managed in a manner that will protect human health and the environment, taking into account local, regional, and global human health and environmental impacts; and
“(vii) the export of elemental mercury for the specified use is consistent with international obligations of the United States intended to reduce global mercury supply, use, and pollution.

“(B) Each exemption issued by the Administrator pursuant to this paragraph shall contain such terms and conditions as are necessary to minimize the export of elemental mercury and ensure that the conditions for granting the exemption will be fully met, and shall contain such other terms and conditions as the Administrator may prescribe. No exemption granted pursuant to this paragraph shall exceed three years in duration and no such exemption shall exceed 10 metric tons of elemental mercury.

“(C) The Administrator may by order suspend or cancel an exemption under this paragraph in the case of a violation described in subparagraph (D).

“(D) A violation of this subsection or the terms and conditions of an exemption, or the submission of false information in connection therewith, shall be considered a prohibited act under section 15, and shall be subject to penalties under section 16, injunctive relief under section 17, and citizen suits under section 20.

“(5) CONSISTENCY WITH TRADE OBLIGATIONS.—Nothing in this subsection affects, replaces, or amends prior law relating to the need for consistency with international trade obligations.

“(6) EXPORT OF COAL.—Nothing in this subsection shall be construed to prohibit the export of coal.”.

SEC. 5. LONG-TERM STORAGE.

(a) DESIGNATION OF FACILITY.—

(1) IN GENERAL.—Not later than January 1, 2010, the Secretary of Energy (referred to in this section as the “Secretary”) shall designate a facility or facilities of the Department of Energy, which shall not include the Y–12 National Security Complex or any other portion or facility of the Oak Ridge Reservation of the Department of Energy, for the purpose of long-term management and storage of elemental mercury generated within the United States.

(2) OPERATION OF FACILITY.—Not later than January 1, 2013, the facility designated in paragraph (1) shall be operational and shall accept custody, for the purpose of long-term management and storage, of elemental mercury generated within the United States and delivered to such facility.

(b) FEES.—

(1) IN GENERAL.—After consultation with persons who are likely to deliver elemental mercury to a designated facility for long-term management and storage under the program prescribed in subsection (a), and with other interested persons, the Secretary shall assess and collect a fee at the time of delivery for providing such management and storage, based on the pro rata cost of long-term management and storage of elemental mercury delivered to the facility. The amount of such fees—

(A) shall be made publically available not later than October 1, 2012;

(B) may be adjusted annually; and
(C) shall be set in an amount sufficient to cover the costs described in paragraph (2).

(2) Costs.—The costs referred to in paragraph (1)(C) are the costs to the Department of Energy of providing such management and storage, including facility operation and maintenance, security, monitoring, reporting, personnel, administration, inspections, training, fire suppression, closure, and other costs required for compliance with applicable law. Such costs shall not include costs associated with land acquisition or permitting of a designated facility under the Solid Waste Disposal Act or other applicable law. Building design and building construction costs shall only be included to the extent that the Secretary finds that the management and storage of elemental mercury accepted under the program under this section cannot be accomplished without construction of a new building or buildings.

(c) Report.—Not later than 60 days after the end of each Federal fiscal year, the Secretary shall transmit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on all of the costs incurred in the previous fiscal year associated with the long-term management and storage of elemental mercury. Such report shall set forth separately the costs associated with activities taken under this section.

(d) Management Standards for a Facility.—

(1) Guidance.—Not later than October 1, 2009, the Secretary, after consultation with the Administrator of the Environmental Protection Agency and all appropriate State agencies in affected States, shall make available, including to potential users of the long-term management and storage program established under subsection (a), guidance that establishes procedures and standards for the receipt, management, and long-term storage of elemental mercury at a designated facility or facilities, including requirements to ensure appropriate use of flasks or other suitable shipping containers. Such procedures and standards shall be protective of human health and the environment and shall ensure that the elemental mercury is stored in a safe, secure, and effective manner. In addition to such procedures and standards, elemental mercury managed and stored under this section at a designated facility shall be subject to the requirements of the Solid Waste Disposal Act, including the requirements of subtitle C of that Act, except as provided in subsection (g)(2) of this section. A designated facility in existence on or before January 1, 2013, is authorized to operate under interim status pursuant to section 3005(e) of the Solid Waste Disposal Act until a final decision on a permit application is made pursuant to section 3005(c) of the Solid Waste Disposal Act. Not later than January 1, 2015, the Administrator of the Environmental Protection Agency (or an authorized State) shall issue a final decision on the permit application.

(2) Training.—The Secretary shall conduct operational training and emergency training for all staff that have responsibilities related to elemental mercury management, transfer, storage, monitoring, or response.
(3) **Equipment.**—The Secretary shall ensure that each designated facility has all equipment necessary for routine operations, emergencies, monitoring, checking inventory, loading, and storing elemental mercury at the facility.

(4) **Fire Detection and Suppression Systems.**—The Secretary shall—

(A) ensure the installation of fire detection systems at each designated facility, including smoke detectors and heat detectors; and

(B) ensure the installation of a permanent fire suppression system, unless the Secretary determines that a permanent fire suppression system is not necessary to protect human health and the environment.

(e) **Indemnification of Persons Delivering Elemental Mercury.**—

(1) In general.—(A) Except as provided in subparagraph (B) and subject to paragraph (2), the Secretary shall hold harmless, defend, and indemnify in full any person who delivers elemental mercury to a designated facility under the program established under subsection (a) from and against any suit, claim, demand or action, liability, judgment, cost, or other fee arising out of any claim for personal injury or property damage (including death, illness, or loss of or damage to property or economic loss) that results from, or is in any manner predicated upon, the release or threatened release of elemental mercury as a result of acts or omissions occurring after such mercury is delivered to a designated facility described in subsection (a).

(B) To the extent that a person described in subparagraph (A) contributed to any such release or threatened release, subparagraph (A) shall not apply.

(2) Conditions.—No indemnification may be afforded under this subsection unless the person seeking indemnification—

(A) notifies the Secretary in writing within 30 days after receiving written notice of the claim for which indemnification is sought;

(B) furnishes to the Secretary copies of pertinent papers the person receives;

(C) furnishes evidence or proof of any claim, loss, or damage covered by this subsection; and

(D) provides, upon request by the Secretary, access to the records and personnel of the person for purposes of defending or settling the claim or action.

(3) Authority of Secretary.—(A) In any case in which the Secretary determines that the Department of Energy may be required to make indemnification payments to a person under this subsection for any suit, claim, demand or action, liability, judgment, cost, or other fee arising out of any claim for personal injury or property damage referred to in paragraph (1)(A), the Secretary may settle or defend, on behalf of that person, the claim for personal injury or property damage.

(B) In any case described in subparagraph (A), if the person to whom the Department of Energy may be required to make indemnification payments does not allow the Secretary to settle or defend the claim, the person may not be afforded indemnification with respect to that claim under this subsection.
(f) TERMS, CONDITIONS, AND PROCEDURES.—The Secretary is authorized to establish such terms, conditions, and procedures as are necessary to carry out this section.

(g) EFFECT ON OTHER LAW.—

(1) IN GENERAL.—Except as provided in paragraph (2), nothing in this section changes or affects any Federal, State, or local law or the obligation of any person to comply with such law.

(2) EXCEPTION.—(A) Elemental mercury that the Secretary is storing on a long-term basis shall not be subject to the storage prohibition of section 3004(j) of the Solid Waste Disposal Act (42 U.S.C. 6924(j)). For the purposes of section 3004(j) of the Solid Waste Disposal Act, a generator accumulating elemental mercury destined for a facility designated by the Secretary under subsection (a) for 90 days or less shall be deemed to be accumulating the mercury to facilitate proper treatment, recovery, or disposal.

(B) Elemental mercury may be stored at a facility with respect to which any permit has been issued under section 3005(c) of the Solid Waste Disposal Act (42 U.S.C. 6925(c)), and shall not be subject to the storage prohibition of section 3004(j) of the Solid Waste Disposal Act (42 U.S.C. 6924(j)) if—

(i) the Secretary is unable to accept the mercury at a facility designated by the Secretary under subsection (a) for reasons beyond the control of the owner or operator of the permitted facility;

(ii) the owner or operator of the permitted facility certifies in writing to the Secretary that it will ship the mercury to the designated facility when the Secretary is able to accept the mercury; and

(iii) the owner or operator of the permitted facility certifies in writing to the Secretary that it will not sell, or otherwise place into commerce, the mercury.

This subparagraph shall not apply to mercury with respect to which the owner or operator of the permitted facility fails to comply with a certification provided under clause (ii) or (iii).

(h) STUDY.—Not later than July 1, 2014, the Secretary shall transmit to the Congress the results of a study, conducted in consultation with the Administrator of the Environmental Protection Agency, that—

(1) determines the impact of the long-term storage program under this section on mercury recycling; and

(2) includes proposals, if necessary, to mitigate any negative impact identified under paragraph (1).

SEC. 6. REPORT TO CONGRESS.

At least 3 years after the effective date of the prohibition on export of elemental mercury under section 12(c) of the Toxic Substances Control Act (15 U.S.C. 2611(c)), as added by section 4 of this Act, but not later than January 1, 2017, the Administrator of the Environmental Protection Agency shall transmit to the Committee on Energy and Commerce of the House of Representatives and the Committee on Environment and Public Works of the Senate a report on the global supply and trade of elemental mercury, including but not limited to the amount of elemental mercury.

“(2) In calculating the average annual expenditure of the Department of Defense for charter air transportation services for purposes of paragraph (1), the Secretary of Defense shall omit from the calculation any fiscal year exhibiting unusually high demand for charter air transportation services if the Secretary determines that the omission of such fiscal year from the calculation will result in a more accurate forecast of anticipated charter air transportation services for purposes of that paragraph.

“(f) ALLOCATION OF MINIMUM PURCHASE AMONG CHARTER AIR TRANSPORTATION CONTRACTS.—(1) The aggregate amount of the minimum purchase amount for all contracts awarded under subsection (c) for a fiscal year, as determined under subsection (e), shall be allocated among all air carriers and air carrier contractor team arrangements awarded contracts under subsection (c) for such fiscal year in proportion to the commitments of such carriers to the Civil Reserve Air Fleet for such fiscal year.

“(2) In determining the minimum purchase amount payable under paragraph (1) under a contract under subsection (c) for charter air transportation services provided by an air carrier or air carrier contractor team arrangement during the fiscal year covered by such contract, the Secretary of Defense may adjust the amount allocated to such carrier or arrangement under paragraph (1) to take into account periods during such fiscal year when charter air transportation services of such carrier or a carrier in such arrangement are unavailable for usage by the Department of Defense, including during periods of refused business or suspended operations or when such carrier is placed in nonuse status pursuant to section 2640 of this title for safety reasons.

“(g) DISTRIBUTION OF AMOUNTS.—If any amount available under this section for the minimum purchase of charter air transportation services from a carrier or air carrier contractor team arrangement for a fiscal year under a contract under subsection (c) is not utilized to purchase charter air transportation services from the carrier or arrangement in such fiscal year, such amount shall be provided to the carrier or arrangement before the first day of the following fiscal year.

“(h) COMMITMENT OF FUNDS.—(1) The Secretary of each military department shall transfer to the transportation working capital fund a percentage of the total amount anticipated to be required in such fiscal year for the payment of minimum purchase amounts under all contracts awarded under subsection (c) for such fiscal year equivalent to the percentage of the anticipated use of charter

   (B) the qualitative measures used to assess the performance of such entity and, based on such qualitative measures, an assessment of the performance of such entity during such period;

SEC. 1035. SENSE OF CONGRESS ON NUCLEAR WEAPONS MANAGEMENT.

(a) FINDINGS.—Congress makes the following findings:

(1) The unauthorized transfer of nuclear weapons from Minot Air Force Base, North Dakota, to Barksdale Air Force Base, Louisiana, in August 2007 was an extraordinary breach of the command and control and security of nuclear weapons.

(2) The reviews conducted following that unauthorized transfer found that the ability of the Department of Defense to provide oversight of nuclear weapons matters had degenerated and that senior level attention to nuclear weapons management is minimal at best.

(3) The lack of attention to nuclear weapons and related equipment by the Department of Defense was demonstrated again when it was discovered in March 2008 that classified equipment from Minuteman III intercontinental ballistic missiles was inadvertently shipped to Taiwan in 2006.

(4) The Department of Defense has insufficient capability and staffing in the Office of the Under Secretary of Defense for Policy to provide the necessary oversight of the nuclear weapons functions of the Department.

(5) The key senior position responsible for nuclear weapons matters in the Department of Defense, the Assistant to the Secretary of Defense for Nuclear and Chemical and Biological Defense Programs, a position filled by appointment by and with the advice and consent of the Senate, was vacant for more than 18 months before being filled in July 2008.

(6) The inability to provide consistent senior level emphasis on nuclear weapons policy has contributed to an erosion in the level of attention paid to nuclear weapons matters across the Department of Defense.

(b) SENSE OF CONGRESS.—It is the sense of Congress that—

(1) the United States should maintain clear and unambiguous command and control of its nuclear weapons;

(2) the safety and security of nuclear weapons and related equipment should be a high priority as long as the United States maintains a stockpile of nuclear weapons;

(3) these objectives will be more successfully attained if greater attention is paid to nuclear weapons matters within the Office of the Secretary of Defense, the Office of the Under Secretary of Defense for Policy, and the Office of the Under Secretary of Defense for Acquisition, Technology, and Logistics;

(4) the Secretary of Defense should consider establishing and filling a senior position, at the level of Assistant Secretary of Defense or Deputy Under Secretary of Defense, within the Office of the Under Secretary of Defense for Policy to hold
primary responsibility for the strategic and nuclear weapons policy of the Department of Defense; and

(5) the Secretary of Defense should clarify the lines of responsibility and accountability for nuclear weapons matters within the Office of the Secretary of Defense to place greater emphasis on strategic and nuclear weapons policy and management.

SEC. 1036. SENSE OF CONGRESS ON JOINT DEPARTMENT OF DEFENSE-FEDERAL AVIATION ADMINISTRATION EXECUTIVE COMMITTEE ON CONFLICT AND DISPUTE RESOLUTION.

(a) FINDINGS.—Congress makes the following findings:

(1) Unmanned aerial systems (UAS) of the Department of Defense, like the Predator and the Global Hawk, have become a critical component of military operations. Unmanned aerial systems are indispensable in the conflict against terrorism and the campaigns in Afghanistan and Iraq.

(2) Unmanned aerial systems of the Department of Defense must operate in the National Airspace System (NAS) for training, operational support to the combatant commands, and support to domestic authorities in emergencies and national disasters.

(3) The Department of Defense has been lax in developing certifications of airworthiness for unmanned aerial systems, qualifications for operators of unmanned aerial systems, databases on safety matters relating to unmanned aerial systems, and standards, technology, and procedures that are necessary for routine access of unmanned aerial systems to the National Airspace System.

(4) As recognized in a Memorandum of Agreement for Operation of Unmanned Aircraft Systems in the National Airspace System signed by the Deputy Secretary of Defense and the Administrator of the Federal Aviation Administration in September 2007, it is vital for the Department of Defense and the Federal Aviation Administration to collaborate closely to achieve progress in gaining access for unmanned aerial systems to the National Airspace System to support military requirements.

(5) The Department of Defense and the Federal Aviation Administration have jointly and separately taken significant actions to improve the access of unmanned aerial systems of the Department of Defense to the National Airspace System, but overall, the pace of progress in access of such systems to the National Airspace System has been insufficient and poses a threat to national security.

(6) Techniques and procedures can be rapidly acquired or developed to temporarily permit safe operations of unmanned aerial systems in the National Airspace System until permanent safe operations of such systems in the National Airspace System can be achieved.

(7) Identifying, developing, approving, implementing, and monitoring the adequacy of these techniques and procedures may require the establishment of a joint Department of Defense-Federal Aviation Administration executive committee reporting to the highest levels of the Department of Defense and the Federal Aviation Administration on matters relating
to the access of unmanned aerial systems of the Department of Defense to the National Airspace System.

(8) Joint management attention at the highest levels of the Department of Defense and the Federal Aviation Administration may also be required on other important issues, such as type ratings for aerial refueling aircraft.

(b) SENSE OF CONGRESS.—It is the sense of Congress that the Secretary of Defense should seek an agreement with the Administrator of the Federal Aviation Administration to jointly establish within the Department of Defense and the Federal Aviation Administration a joint Department of Defense–Federal Aviation Administration executive committee on conflict and dispute resolution which would—

(1) act as a focal point for the resolution of disputes on matters of policy and procedures between the Department of Defense and the Federal Aviation Administration with respect to—

(A) airspace, aircraft certifications, and aircrew training; and

(B) other issues brought before the joint executive committee by the Department of Defense or the Department of Transportation;

(2) identify solutions to the range of technical, procedural, and policy concerns arising in the disputes described in paragraph (1); and

(3) identify solutions to the range of technical, procedural, and policy concerns arising in the integration of Department of Defense unmanned aerial systems into the National Airspace System in order to achieve the increasing, and ultimately routine, access of such systems into the National Airspace System.

SEC. 1037. SENSE OF CONGRESS ON SALE OF NEW OUTSIZE CARGO, STRATEGIC AIRLIFT AIRCRAFT FOR CIVILIAN USE.

(a) FINDINGS.—Congress makes the following findings:

(1) The 2006 Quadrennial Defense Review and the 2005 Mobility Capability Study determined that the United States Transportation Command requires a force of 292 to 383 organic strategic airlift aircraft, augmented by procurement of airlift service from commercial air carriers participating in the Civil Reserve Air Fleet, to meet the demands of the National Military Strategy. Congress has authorized and appropriated funds for 316 strategic airlift aircraft.

(2) The commander of the United States Transportation Command has testified to Congress that it is essential to safeguard the capabilities and capacity of the Civil Reserve Air Fleet to meet wartime surge demands in connection with major combat operations and that procurement by the Air Force of excess organic strategic airlift aircraft could be harmful to the health of the Civil Reserve Air Fleet.

(3) The C–17 aircraft is used extensively by the Air Mobility Command in the Global War on Terror. Production of the C–17 aircraft is scheduled to cease in August, 2010.

(4) The Federal Aviation Administration has informed Congress that no fewer than six commercial operators have expressed interest in operating a commercial variant of the C–17 aircraft. Commercial sale of the new C–17 aircraft would require that the Department of Defense determine that it is
